### **Homepage**

The homepage of the device is the main function entrance of the device, the core functions: translation, recording, input translation, photo translation etc. Click on it to enter the corresponding function page.

### **Status bar**

Displays some status information about the device at the top of the device screen.

For WIFI network status, Bluetooth, battery status.

### **Main function introduction:**

Online translation/offline translation.

The translation function has two states: online translation and offline translation, which will automatically switch depending on the current state of the translator.

Online translation currently supports real-time translation between 109 languages (subject to change with version updates).

Offline translation currently supports 13 popular languages for offline translation (subject to change with version updates). When the translator is offline, the translation automatically switches to offline translation. (You need to download the offline package in the settings in advance)

Click on the language option at the top of the translation page to enter the language selection page and select the source/target language as required.

### **Voice recognition.**

Press and hold the Translate A or B button on the device to enter the voice recognition mode.

After releasing the A or B button, the voice will be automatically recognized and translated into the specified target language. If automatic voice announcement is switched on in the settings, the translated target language is played back automatically.

List shows text records of voice translation, when there are too many translation records, swipe up and down the page to view the translation records

### **Favorites:**

Long press the translation result to pop up the option, and click the “favorites” option. Swipe right on the translation interface to enter the “favorites” page, you can view the favorite record, click the voice prompt on the favorite page, and long press to cancel the favorite. **Note: At present, the maximum number of translation results that can be saved is 50.**

### **Audio translation:**

Language selection: The recording function supports recording recognition of 3 (Mandarin, Cantonese and English) mainstream languages and supports transcription of 108 translated texts (subject to change with version updates). Click on the language option at the top of the recording screen to enter the language selection list, then click on the desired source language/target

language.

Recording recognition: Tap on the 'microphone' icon at the bottom of the recording screen to start recording. The source language set is automatically recognized during the recording process and the recognized text is displayed on the page. Click on the icon “” at the top right to switch between viewing the source language and the target translated text.

Save recording results: click on the stop icon directly below during recording to bring up a confirmation box for the save operation, click to confirm and the recording file will be saved automatically. Click on the top right corner “” to enter the recording list for viewing. 1 hour recording time is supported.

#### **Photo translation:**

The translator currently supports photo translation in 43 languages. Click on the language option at the top of the photo translation interface to enter the language selection list, and then click on the desired source language/target language option.

Take a photo to translate: Tap the screen to focus on the text you want to translate, then tap the photo button at the bottom of the screen.

The translation result will be displayed after recognition.

MIC	Dual MEMS MIC
Power Adaptor	AC100V - 240V 50Hz/60Hz Output 5V/1A
Speed	4xCortex-A53 1.5GHz

This equipment has been tested and found to comply with the limits for a Class B digital device, pursuant to part 15 of the FCC Rules. These limits are designed to provide reasonable protection against harmful interference in a residential installation. This equipment generates, uses and can radiate radio frequency energy and, if not installed and used in accordance with the instructions, may cause harmful interference to radio communications. However, there is no guarantee that interference will not occur in a particular installation. If this equipment does cause harmful interference to radio or television reception, which can be determined by turning the equipment off and on, the user is encouraged to try to correct the interference by one or more of the following measures:

- Reorient or relocate the receiving antenna.
- Increase the separation between the equipment and receiver.
- Connect the equipment into an outlet on a circuit different from that to which the receiver is connected.
- Consult the dealer or an experienced radio/TV technician for help.

Caution: Any changes or modifications to this device not explicitly approved by manufacturer could void your authority to operate this equipment.

This device complies with part 15 of the FCC Rules. Operation is subject to the following two conditions: (1) This device may not cause harmful interference, and (2) this device must accept any interference received, including interference that may cause undesired operation.

This equipment complies with FCC RF radiation exposure limits set forth for an uncontrolled environment. This device and its antenna must not be located or operating in conjunction with any other antenna or transmitter.
