## 1. Important Notices

- To ensure the normal use of various functions of this product, please read this manual carefully before use. And pay attention to the following matters:
- When charging the battery for the first time, please charge continuously for more than 16 hours.
- For your personal safety, please do not use this product while driving.
- If encountering thunderstorm weather, please avoid using this machine.
- Shutdown should be performed on airplanes, hospitals, near hazardous materials, gas stations, and near hazardous materials such as fuel and chemical agents.
- Please turn off the phone near medical devices that indicate that wireless phones cannot be used. This phone may interfere with implanted pacemakers, hearing aids, and other medical implanted devices.
- Using this product near electrical equipment such as televisions, radios, and computers may cause interference, thereby affecting telephone performance.
- Please shut down and clean the phone. When cleaning the phone, please use a slightly damp or anti-static cloth, and do not use cleaning agents or other chemical products.
- This product generates electromagnetic fields, please do

not place it near magnetic storage media such as computer disks.

- Please do not expose this product to strong sunlight to avoid heating.
- Please avoid all kinds of liquids entering the interior of the phone to avoid damage.
- Please do not throw, place, or tap the phone rudely, otherwise it may cause damage to the internal circuit board
- Before sending and receiving calls, please pay attention to the local legal system regarding the use of mobile wireless phones and be mindful of it during use.
- Please use the power adapter and battery specified by the manufacturer, as using other power supply devices may cause danger.
- Due to the continuous upgrading of the phone's functions, there may be some discrepancies with the manual during actual use. We apologize for any inconvenience caused.

## 2. Feature

- bands:2G GSM、3G WCDMA 850/1900MHz。
- LCD display with green backlight,
- Speed dialing, redial function
- Phonebook
- Two ways handsfree
- Mute
- Handset and speaker volume adjustable
- Selectable ring tones and alarming tones
- Selectable SMS tones
- Receiving and sending short message in  
Spanish and English
- FM radio

### 3. Technology

- Environmental temperature:  $-10^{\circ}\text{C} \sim 55^{\circ}\text{C}$
- Relative humidity:  $\leq 90\%$
- Atmospheric pressure: 86-106Kpa
- Working frequency: 2G: GSM Quad
- Band; 3G: WCDMA 850/1900MHz
- Size: 220 \* 175 \* 65mm (length \* width \* height)
- Working voltage: AC220V, 50Hz, USB 5V 1000mA
- Backup battery: Rechargeable lithium battery 3.7V 1000mAh
- Standby time: 48 hours or more
- Continuous call duration: about 4 hours

Note: The standby time and continuous call time depend on the local network situation.

## 6. Installing your phone

Installing SIM card and battery

**A.** After opening the battery cover, insert the SIM card horizontally with the metal side facing downwards (with the notch facing you) so that the SIM card metal plate makes good contact with the card holder.

**B.** Insert the battery connector of the phone into the socket at the bottom right corner of the battery compartment, then place the battery horizontally in the compartment, and finally close the battery cover.

**C.** Attention:

**D.** It is absolutely forbidden to insert or remove a SIM card while it is turned on, otherwise the SIM card

**E.** may be damaged.

**F.** Connect external power supply

**G.** Connect one end of the power supply provided by the phone to the mains, and the other end to the SUB power socket at the back of the phone.

**H.** connection handle

**I.** Connect one end of the handle provided with the phone to the interface at the end of the handle, and the other end to the i

interface on the left side of the phone.

**J.** Power on/off

**K.** Before starting up, please ensure that the phone battery is charged or connected to an external power source, and that the SIM card is installed correctly; Press the "On/Off" button again to turn on the device. The interface with the name of the network operator that appears after the startup ringtone and startup animation is the standby interface.

**L.** In the standby interface, long press the ON/OFF key and you will see a shutdown animation accompanied by a shutdown bell, and then your phone will be turned off.

## **7.Phone operation**

### **7.1 Making phone calls**

In standby mode, pick up the receiver or press the hands-free button, then press the number keys to input the number; After entering the number, press the [Redial/Send] button to make a phone call.

### **7.2 Answer phone calls**

When there is an incoming call on the phone, there will be

a ringtone prompt. If the incoming number is stored in the phone book, the corresponding name will be displayed. Pick up the receiver or press the hands-free button to answer the call. When using the earpiece to answer, put the earpiece back in place and perform the hang up operation; When making a hands-free call, press the hands-free button again to hang up.

### 7.3 Hands free function

Press the [Handsfree] button to directly answer or make a call. Lifting the earpiece will switch to a controller call, and the call will end and hang up directly. If you need to switch to a hands-free call during a call, you should press the hands-free button before putting the controller back in place.

### 7.4 Sending

After entering the number, press the [Redial/Send] button to dial this number.

When checking the phone book, if you find the number you want to dial, simply press the [Redial/Send] button.

### 7.5 Redial

Press the [Redial/Send] button on the standby interface, a

nd the phone will directly dial the nearest set of outgoing numbers;

After the phone handle or hands-free pick up, press the [Redial/Send] button, and the phone will directly dial the nearest set of outgoing numbers;

## 7.6 Adjusting call volume

During a call, press the ▲ key to increase the call volume; Press the ▼ key to reduce the call volume; There are 9 levels of adjustable volume.

# 8. Menu setting

8.1 allows you to save multiple sets of names and phone numbers on your SIM card or phone. Through this menu, you can perform operations such as adding, searching, and deleting. In standby mode, press the [Contact Book/Back] button to quickly access the phone book list. In standby mode, press the [Menu] key to enter the main menu, select contacts, press OK to enter the sub menu of contacts, and the cursor will be displayed at the first record in the contacts. Press any number key or ▲ key to move the cursor to the search area;

## Search:

Search for the contact record you need to search for, and when the cursor is displayed in the search area, directly enter the desired contact information

The name or number of the contact you want to search for can be quickly searched for. After finding the corresponding contact record, press the ▼ key to move the cursor to the corresponding record, and press the 【 OK 】 key to enter its subdirectory. You will be able to view details, edit, dial, send text messages, and other operations.

- **Details:** View the detailed content of the record; You can also view the detailed content of the record by pressing [MEN/OK]; When viewing detailed records, press the [MEN/OK] key to directly enter editing mode. Press the option key in the bottom left corner to perform the following operations:

- **Editing:** Edit the record
- **Delete:** Delete the record;
- **Copy:** Copy the record from the SIM card to the phone (or from the phone to the SIM card)
- **New:** Add a new record and save it to Phone or SIM;
- **Write message:** edit the message for the phone number and send the short message;

Call: The selected record of the call;

- **delete:** delete the currently selected number;

Delete multiple: can mark and select to delete some or all records from the SIM card or phone;

Copy contacts: Copy all or marked partial records from the SIM card to the phone, or copy all or marked partial records from the phone to the SIM card;

- **Import/Export:** Import and export contacts.
- **Other:** Speed dial can be set to 2-9; Check the available capacity of the SIM card or local device.

## 8.2 SMS

The phone's inbox, outbox, draft box, and sent messages can store over 200 short messages, and the storage capacity in the SIM card depends on the specific situation of the card. The inbox stores all received SMS, the outbox stores SMS that were not successfully sent, and the draft box stores messages that were not sent but have been saved. If a message has been sent, it will save the message that was successfully sent.

In standby mode, press the [Menu] key to enter the main menu, press the [▲, ▼] key to select SMS, then press the [OK] key to enter the SMS menu. Press the [▲, ▼] key to move the cursor and select any submenu under SMS. The phone can

enter the following operations:

### 8-2-1 Write message:

In standby mode, after entering the information service submenu from the menu, press the 【▲, ▼】 keys to select "write message", and the cursor will be displayed on the screen. At this time, directly enter the text message content (see "9. Introduction to Input Method" for input methods). After entering, press the 【 Options 】 key, and the screen will prompt:

- **Send:** Send this text message;
- **Add common phrases:** Insert common phrases saved in the phone;
- **Save to Draft Box:** The currently edited SMS content can be saved to the draft box.
- **Exit:** Exit SMS editing mode.

### 8-2-2 Inbox

After entering the SMS submenu, press the 【 ▲, ▼ 】 keys to select the inbox and confirm. The screen displays a list of received SMS messages. Press the 【 ▲, ▼ 】 keys to select a certain information, then press the 【 OK 】 key or 【 Options 】 key to enter the options menu. You can perform the following operations on this record:

- **Selection:** View SMS content;

After viewing the content of the text message, you can perform the following operations:

- **Forward:** Forward the short message to others;
- **Delete:** Delete the short message;
- **Delete All:** Delete all information from the receiving mailbox
- **Reply:** The sender's reply to this message;
- **Dialing:** Call the sender of the text message;
- **Add to contact:** Add the selected number to the address book or overwrite the original record by adding the selected number to the address book;
- **Delete duplicate numbers:** Information about duplicate numbers can be deleted.
- **Add to blacklist:** The contacts of this message can be added to the blacklist.
- **Delete All:** Delete all information from the inbox list;
- **Exit:** Exit the inbox menu.

### **8-2-3 Outbox:**

The Outbox stores SMS messages that were not successfully sent. The operation method can refer to the 8-2-2 inbox.

### **8-2-4Draft Box:**

Information that has not been sent but has been saved is s

aved in the draft box. The operation method can refer to the 8-2-2 inbox.

#### **8-2-5 Sent Mailboxes:**

The sSp, SSP, Ssp, Sp, sp, and SP input methods are general Spanish input modes, where you can input the letters you want by pressing the number keys.

### 123 Number Input Method

In the number input method, you can input numbers by pressing the number keys.

### FCC Caution:

Any changes or modifications not expressly approved by the party responsible for compliance could void the user's authority to operate this equipment.

This device complies with Part 15 of the FCC Rules. Operation is subject to the following two conditions:

- (1) This device may not cause harmful interference, and
- (2) this device must accept any interference received, including interference that may cause undesired operation.

This Product meets the government's requirements for exposure to radio waves. The guidelines are based on standards that were developed by independent scientific organizations through periodic and thorough evaluation of scientific studies. The standards include a substantial safety margin designed to assure the safety of all persons regardless of age or health.

FCC RF Exposure Information and Statement the SAR limit of USA (FCC) is 1.6 W/kg averaged over one gram of this Device 3G DESK PHONE (FCC ID: O55131324) has been tested against this SAR limit. SAR information on this can be viewed on-line at <http://www.fcc.gov/oet/ea/fccid/>. Please use

the device FCC ID number for search. This device was tested for typical operations 10mm from the body. To maintain compliance with FCC RF exposure requirements, 10mm separation distance should be maintained to the user's bodies

**NOTE:**

This equipment has been tested and found to comply with the limits for a Class B digital device, pursuant to Part 15 of the FCC Rules. These limits are designed to provide reasonable protection against harmful interference in a residential installation. This equipment generates, uses and can radiate radiofrequency energy and, if not installed and used in accordance with the instructions, may cause harmful interference to radio communications.

However,

there is no guarantee that interference will not occur in a particular installation.

If this equipment does cause harmful interference to radio or television reception,

which can be determined by turning the equipment off and on, the user is encouraged to try to correct the

interference by one or more of the following measures:

- Reorient or relocate the receiving antenna.
- Increase the separation between the equipment and receiver.
- Connect the equipment into an outlet on a circuit different from that to which the receiver is connected.
- Consult the dealer or an experienced radio/TV technician for help.
