Subject: Limits

The Test Report contains data for 15.231(a) limits and 15.231.(e) limits.

The line item in the application is for 15.231(e).

Why do you have data for both limits?

Is this a 15.231(a) or 15.231(e) device?

You cannot have both. Please explain.

Sir, it sounds like we accidentally 'double-clicked' on " 15.231(e) " during the submission. All of our Part 15 devices that operate at 345 MHz. Operate under 15.231.a. Sorry for the confusion.

Best Regards,

Greg Barbato
