## **FCC 47 CFR MPE REPORT**

#### **INMUSIC BRANDS INC**

All-in-one presentation station with built-in rechargeable speaker

Model Number: PRESENTER PA

Additional Model: DA30, PRESENTER\*\*\*\*\*\*\*,

DA\*\*\*\*\* (\*\* can be 0-9, A-Z or blank)

FCC ID: Y4O-DA30

EST Technology Co. ,Ltd Report No. ESTE-R2004039

## **Maximum Permissible Exposure**

## 1. Applicable Standards

Systems operating under the provisions of this section shall be operated in a manner that ensures that the public is not exposed to radio frequency energy level in excess limit for maximum permissible exposure. In accordance with 47 CFR FCC Part 2 Subpart J, section 2.1091 this device has been defined as a mobile device whereby a distance of 0.2m normally can be maintained between the user and the device.

### 1.1. Limits for Maximum Permissible Exposure (MPE)

### (a) Limits for Occupational/Controlled Exposure

| Frequency  | Electric Field | Magnetic Field | Power Density (S) | Averaging Times                  |
|------------|----------------|----------------|-------------------|----------------------------------|
| Range      | Strength (E)   | Strength (H)   | $(mW/cm^2)$       | $  E  ^2,   H  ^2 \text{ or } S$ |
| (MHz)      | (V/m)          | (A/m)          |                   | (minutes)                        |
| 0.3-3.0    | 614            | 1.63           | (100)*            | 6                                |
| 3.0-30     | 1842/f         | 4.89/f         | (900/f)*          | 6                                |
| 30-300     | 61.4           | 0.163          | 1.0               | 6                                |
| 300-1500   |                |                | F/300             | 6                                |
| 1500-10000 |                |                | 5                 | 6                                |

#### (b) Limits for General Population / Uncontrolled Exposure

| Frequency   | Electric Field | Magnetic Field | Power Density (S) | Averaging Times               |
|-------------|----------------|----------------|-------------------|-------------------------------|
| Range (MHz) | Strength (E)   | Strength (H)   | $(mW/cm^2)$       | $  E ^2,  H ^2 \text{ or } S$ |
|             | (V/m)          | (A/m)          |                   | (minutes)                     |
| 0.3-1.34    | 614            | 1.63           | (100)*            | 30                            |
| 1.34-30     | 824/f          | 2.19/f         | (180/f)*          | 30                            |
| 30-300      | 27.5           | 0.073          | 0.2               | 30                            |
| 300-1500    |                |                | F/1500            | 30                            |
| 1500-10000  |                |                | 1.0               | 30                            |

Note: f=frequency in MHz; \*Plane-wave equivalent power density

EST Technology Co. ,Ltd Report No.

#### 1.2. MPE Calculation Method

$$E (V/m) = \frac{\sqrt{30 \times P \times G}}{d}$$
 Power Density: Pd  $(W/m^2) = \frac{E^2}{377}$ 

E = Electric Field (V/m)

P = Peak RF output Power (W)

G = EUT Antenna numeric gain (numeric)

d = Separation distance between radiator and human body (m)

The formula can be changed to

$$Pd = \frac{30 \times P \times G}{377 \times d^2}$$

From the peak EUT RF output power, the minimum mobile separation distance, d=0.2m, as well as the gain of the used antenna, the RF power density can be obtained

# 2. Conducted Power Result

| Mode   | Frequency (MHz) | Peak output power (dBm) | D 1                    | Target      | Antenna gain |          |
|--------|-----------------|-------------------------|------------------------|-------------|--------------|----------|
|        |                 |                         | Peak output power (mW) | power (dBm) | (dBi)        | (Linear) |
| GFSK   | 2402            | -0.68                   | 0.855                  | -1±1        | 2            | 1.585    |
|        | 2441            | -1.15                   | 0.767                  | -2±1        | 2            | 1.585    |
|        | 2480            | -1.56                   | 0.698                  | -2±1        | 2            | 1.585    |
| 8-DPSK | 2402            | -1.10                   | 0.776                  | -2±1        | 2            | 1.585    |
|        | 2441            | -1.55                   | 0.700                  | -2±1        | 2            | 1.585    |
|        | 2480            | -1.96                   | 0.637                  | -2±1        | 2            | 1.585    |

# 3. Calculated Result and Limit

|        |                    | Antenna gain |          |             | Limited       |                |
|--------|--------------------|--------------|----------|-------------|---------------|----------------|
|        | T 4                |              |          | Power       | of            |                |
| Mode   | Target power (dBm) | (dBi)        | (Linear) | Density (S) | Power Density | Test<br>Result |
