

DFUT Installation Guide (80-25811-1 X2) Errata Sheet Input

MPE Distance Restriction Statement to be Added to Step 1. Safety Considerations:

RF Safety Note:

RF field intensity at the surface of the transmitting Globalstar antenna is fairly high. Maintaining a minimum line-of-sight separation distance of 35 cm (14 inches) between the transmitting antenna and all personnel will ensure that the General Population / Uncontrolled Exposure maximum permissible exposure (MPE) limits are not exceeded. This satisfies the MPE limits mandated by the FCC in 47 CFR Ch. 1 (10-1-98 Edition), Part 1, §1.1310 and defined in the ANSI/IEEE C95.1-1992 standard. It also satisfies the slightly more-stringent European and international exposure limit recommendations of the International Radiation Protection Association (in the IRPA Guidelines on Protection Against Non-Ionizing Radiation, 1991) and of the International Commission on Non-Ionizing Radiation Protection (ICNIRP), 1996.
