TÜV Rheinland Certification

Low Blue Light (Hardware Solution) was developed to control the blue light range emission. Instead of reducing the total blue range, the selected range reduction does not impact CCT and display color. It exposes users to less blue light emission while letting them enjoy good color on the display.
TÜV Rheinland has tested this product in order to ascertain the product can offer an effective reduction of hazardous blue light by offering a hardware solution that can filter or reduce the blue light range of the display spectrum.
Flicker Free confirms that the device has no visible and invisible flicker within the range of 0 - 3000 Hz under various brightness settings.
Recommendations for use

Recommendations for use:
It is recommended to not use the glasses for more than 2 hours per session.
Take at least a 10 to 15 minutes break every 45 minutes, even if you don't think you need it.
Please take more regular or longer breaks if needed.
使用提醒:
每次使用眼镜的时间不建议超过2小时，每使用45分钟，即使未感觉疲劳，也应休息10到15分钟。
如需要，可延长休息频率或延长休息时间。
