To whom it may concern,

**Subject: Murata Bluetooth Device**

This is a frequency hopping device. The channels are selected within this device and are not controlled in any way by the host Tait portable radio.

The device has a frequency hopping range of 2402.0 to 2480.0 MHz.

Yours sincerely,

A handwritten signature in black ink, appearing to read "D. Jackson", with a stylized flourish at the end.

David Jackson  
Test Laboratory Manager
