HTC Phone

Unboxing and setup

HTC Phone overview

After taking HTC Phone out of the box, familiarize yourself first with the location of the card tray, controls, and sensors.

1. Notification LED
2. Proximity and light sensor
3. Microphones
4. VOLUME control
5. POWER button
6. Dual speakers
7. USB Type-C™ connector
8. Edge Sense squeeze area
9. nano SIM and storage card tray
10. Dual front cameras

You need a 4G/LTE™ plan to use your operator's 4G/LTE network for voice calls and data services. Check with your operator for details.

- Before use, check all the items in the box and make sure there's no damage to any of the items.
- Use the case if it's provided in the box or purchase one that's designed for HTC Phone to help protect your phone from accidental bumps and scratches. Also make sure the case doesn't block the Edge Sense area.
- If you want to use a screen protector, don't cover and block the proximity and light sensor. Purchase a screen protector designed for HTC Phone.
- Don't disassemble any part of the phone. Don't try to open the phone or remove the battery by force. This may damage the phone or its electronics and will invalidate the warranty.
- Please read the safety and usage guidelines in the Safety and regulatory guide that's included in the box.

Back panel

1. Dual cameras
2. Microphone
3. Dual LED flash
4. Fingerprint scanner
5. Laser autofocus

Card tray

When inserting the eject tool into the tray eject hole to remove the card tray, do not obstruct the tray to avoid damaging the eject mechanism inside the slot.

nano SIM card

Use a standard nano SIM card. A modified card that is thicker than the standard nano SIM card will not fit properly on the tray and may damage the card slot.

Inserting the nano SIM card

1. Hold the phone face up.
2. Insert the tip of the tray eject tool that came with your phone—or a small bent paperclip—into the tray eject hole.

3. Push the tip all the way into the hole until the tray ejects, and then pull the tray out.
4. Do the following to place your nano SIM card into the tray:

With your nano SIM card's gold contacts facing down, place the card into the SIM holder of the tray. Make sure to align the cutoff corner to the notch on the holder.

Place your microSD™ card into the SD holder of the tray. See [Inserting the microSD card](#) on page 23.

- When reinserting the tray, make sure it is facing up so that your cards don't fall out. Hold the tray with the outer card holder between your fingers, and then steadily slide the tray all the way into the slot.

- Make sure the tray is fully inserted and doesn't protrude from the slot.

Removing the nano SIM card

- Hold the phone face up.
- Insert the tip of the tray eject tool or a small bent paperclip into the tray eject hole.

- Push the tip all the way into the hole until the card tray ejects.
- Pull the tray out, and then remove the nano SIM card.
- To reinsert the tray, center it first in the slot, and then slide it all the way in.
- Make sure the tray is fully inserted and doesn't protrude from the slot.

Storage card

Use a storage card to store your photos, videos, and music. When you need to free up phone storage space, you can also move certain apps to the storage card, if the apps support this feature.

The storage card is optional and sold separately.

Inserting the microSD card

1. Hold the phone face up.
2. Insert the tip of the tray eject tool that came with your phone—or a small bent paperclip—into the tray eject hole.

3. Push the tip all the way into the hole until the tray ejects, and then pull the tray out.
4. Place your microSD card—gold contacts facing down and narrow side facing in—into the SD holder of the tray.

5. When reinserting the tray, make sure it is facing up so that the nano SIM and microSD cards don't fall out. Hold the tray with the outer card holder between your fingers, and then steadily slide the tray all the way into the slot.

6. Make sure the tray is fully inserted and doesn't protrude from the slot.

If it's the first time you insert a microSD card, you'll be prompted to set it up.

Unmounting the storage card

When you need to remove the storage card while HTC Phone is on, unmount the storage card first to prevent corrupting or damaging the files in the storage card.

If your storage card is used as internal storage and there are apps that were moved to the card, you will not be able to open these apps after unmounting the card.

1. From the Home screen, swipe up and then tap **Settings** **Storage**.
2. Do one of the following:
 - If your storage card appears under Portable storage, tap  **Eject**.
 - If your storage card appears under Device storage, tap the card name, and then tap **Eject**.

Removing the microSD card

Make sure to unmount your microSD card before removing it. See [Unmounting the storage card](#) on page 24.

1. Hold the phone face up.
2. Insert the tip of the tray eject tool that came with your phone—or a small bent paperclip—into the tray eject hole.

3. Push the tip all the way into the hole until the tray ejects.
4. Pull the tray out, and remove the microSD card.
5. To reinsert the tray, center it first in the slot, and then slide it all the way in.
6. Make sure the tray is fully inserted and doesn't protrude from the slot.

Charging the battery

Before you turn on and start using HTC Phone, it is recommended that you charge the battery.

- If the battery has been discharged for several days, you may need to charge HTC Phone for several minutes before powering it on.
- Use only the adapter and the USB Type-C cable that came with HTC Phone to charge the battery. When the battery power is too low, make sure to use the power adapter to charge, not the USB cable connection with your computer.

1. Insert the small end of the USB Type-C cable into the USB Type-C connector.

2. Insert the other end of the USB Type-C cable into the power adapter.
3. Plug in the power adapter to an electrical outlet to start charging the battery.

- As a safety precaution, the battery may stop charging to avoid overheating.
- Avoid charging the battery in hot environments.
- When you're using the web browser and charging the battery, HTC Phone may become warmer. This is normal.
- To conserve energy, unplug the power adapter from the electrical outlet after you finish charging.

Switching the power on or off

Switching the power on

Press the POWER button until HTC Phone vibrates.

- When you turn on HTC Phone for the first time, you'll need to set it up.

Switching the power off

1. If the display is off, press the POWER button to turn it back on.
2. Press and hold the POWER button for a few seconds.
3. Tap **Power off** on the options menu.

Setting up HTC Phone for the first time

When you switch on HTC Phone for the first time—or after you’ve done a factory reset—you’ll need to set it up.

If you have data from a previous HTC phone that you need to copy, first back up the phone’s data before you start setting up HTC Phone. For guidance, go to htc.com/support and then click **Backup and Transfer**.

1. If you need to navigate by voice feedback, turn on TalkBack by pressing and holding two fingers on the first screen until you hear a message and then a beep.
Or if you accidentally enabled TalkBack, follow the onscreen tutorial to turn it off.
2. Choose the system language you want to use, read and agree to the terms of use, choose your Internet connection, and sign in to your Google® Account.
3. On the screen that asks you which device to restore from, do one of the following:
 - If you backed up your old phone using your Google Account, tap the phone name. Tap ✓ to select the apps to install, and then tap **Restore**.
 - If you want to start fresh, tap **Don’t restore**.
4. On the Google services screen, make sure the **Back up to Google Drive** option is turned on to automatically back up HTC Phone. It’s also recommended to have the options under Location and Device maintenance turned on.
5. Set up Google Assistant, or do this later. For details, visit support.google.com/assistant/.
6. Sign in to your HTC Account to use the same login credentials for HTC services such as Themes and HTC Sense Companion.
7. Set up Edge Sense so you can instantly take camera shots or perform other actions by simply squeezing your phone. See [What is Edge Sense?](#) on page 52 for details.
8. Tap **Set up fingerprint** to add your fingerprint and use it for unlocking your phone. See [Fingerprint scanner](#) on page 27 for details.
9. Follow the remaining instructions to finish your phone setup.

Some features that need to connect to the Internet such as location-based services and auto-sync of your online accounts may incur extra data fees. To avoid incurring data fees, disable these features under Settings. For more information on location services, see [Location settings](#) on page 158.

Adding your social networks, email accounts, and more

You can sync contacts, calendars, and other information from your social networks, email accounts, and online services on HTC Phone. Depending on the account type, signing in to your online accounts lets you sync updates between HTC Phone and the Web.

1. From the Home screen, swipe up and then tap **Settings > Accounts & sync**.
2. Tap **Add account**.
3. Tap the account type you want to add.
4. Follow the onscreen instructions to enter your account information.

You can add several Google Accounts.

Syncing your accounts

1. From the Home screen, swipe up and then tap **Settings > Accounts & sync**.
2. Tap the Automatically sync data **On/Off** switch to turn automatic sync of all your accounts on or off.
3. To manually sync individual accounts, tap an account, tap **Account sync**, and then tap **⋮ > Sync now**.

On the Account sync screen, you can also change the sync settings for your Google Account.

Removing an account

Remove accounts from HTC Phone if you no longer use them. Removing an account does not remove accounts and information from the online service itself.

1. From the Home screen, swipe up and then tap **Settings > Accounts & sync**.
2. Tap an account.
3. Tap **Remove Account**.

Some personal data may be retained by the third-party app after you have removed the account from HTC Phone.

Fingerprint scanner

You can quickly wake up and unlock the HTC Phone using your fingerprint. You can add up to 5 fingerprints.

When setting up and using the fingerprint scanner, follow these tips:

- Make sure your finger and the fingerprint scanner are dry and clean.
- Use the entire pad of your finger, including the sides and tip.
- When recording your fingerprint, touch the scanner until it vibrates.
- The fingerprint scanner has 360° readability—you can touch a recorded finger at any angle to the scanner to turn on the screen or unlock the HTC Phone.

You may not be able to set the fingerprint scanner to unlock HTC Phone, if you've signed in to an Exchange ActiveSync® account that requires you to set a different screen lock option (such as password). Check with your Exchange Server administrator if your Exchange ActiveSync account supports the fingerprint scanner.

Adding a fingerprint the first time

1. From the Home screen, swipe up and then find and tap **Settings > Fingerprint scanner**.
2. Tap **Add fingerprint**.
If you haven't already set up a screen lock, you'll be asked to choose and set up a backup pattern, PIN, or password for unlocking your phone. See [Setting a screen lock](#) on page 164.
3. If prompted, choose how you want to show notification content when your phone is locked, and then tap **Done**.
4. Touch the fingerprint scanner or tap **Start**.
5. Place the finger you want to use on the scanner until it vibrates, then lift your finger.
6. Repeatedly touch the scanner until the fingerprint has been successfully recorded. You'll get the best results if you hold your finger in the same direction when touching the scanner.
7. After you've successfully recorded your fingerprint, tap **Done**.

You can now use your fingerprint to wake up and unlock your phone.

You'll need to input your backup lock screen pattern, PIN, or password if the scanner doesn't identify your fingerprint after five attempts. You'll only have 10 additional attempts before your data is deleted from the phone.

Fingerprint scanner settings

There are certain things you can do with the fingerprint scanner with or without your fingerprint added. You can turn these features on or off in Settings.

1. From the Home screen, swipe up and then find and tap **Settings > Fingerprint scanner**.
2. Enter your pattern, PIN, or password.

3. When you touch the fingerprint scanner, below are features that would work even without your fingerprint added. You can turn these features on or off:
 - **Wake up screen:** Wakes up to the lock screen.
 - **Tap to take a selfie:** Captures selfies while you're using the Selfie Photo or Selfie Video mode in the HTC Camera app. This feature is available only in phones that have the fingerprint scanner at the back panel,
4. To manage your fingerprints:
 - Tap **Add fingerprint** to add one or more fingerprints that you can use for unlocking your phone.
 - Select or clear **Vibrate on scan**, depending on whether you like to have vibration feedback when touching the fingerprint scanner.
 - Tap a recorded fingerprint to rename or delete it.
 - Tap **Reset fingerprint scanner** to delete all recorded fingerprints.

Navigation Bar

Use the available action buttons on the Navigation Bar to perform frequently-used actions by using just one hand. Swap in and out action buttons to suit your needs.

Here's what you can do on the Navigation Bar:

- Tap  to hide the Navigation Bar.

- On some screens, you cannot hide the Navigation Bar.
- When in full screen, swipe up from the bottom of the screen to show the Navigation Bar. Tap  to keep the Navigation Bar showing at the bottom of the screen.

- Tap  to go back to the previous screen.
- Tap  to go to the Home screen.
- Tap  to show recent apps that you've used.
- Tap  to turn off the screen.
- Tap  to record the actions you do onscreen. See [Recording the phone screen](#) on page 48
- Tap  to capture a screenshot. See [Capturing your phone's screen](#) on page 46 and [Capturing a partial screenshot](#) on page 46.
- Tap  to show the Notifications panel. See [Notifications panel](#) on page 41.
- Tap  to show the Quick Settings panel. See [Using Quick Settings](#) on page 38.

Swipe left on the Navigation Bar to go to the second panel and see the other action buttons.

Customizing the Navigation Bar

Change the buttons shown on the Navigation Bar and even rearrange the order. A Navigation Bar panel can have up to 5 buttons.

1. From the Home screen, swipe up and then tap **Settings > Personalize**.
2. Tap **Change navigation buttons**.
3. You can:
 - Add a button to a panel by dragging a button that's below the line to one of the panels.
 - Rearrange the button order by dragging a button to its new position on a panel.
 - Remove a button from a panel by dragging it below the line.

You cannot remove □ , ○ , and ◀ from the Navigation Bar or move them to the second panel.

Your first week with your new phone

HTC Sense Home

After you've turned on and set up HTC Phone for the first time, you'll see the Home screen.

- Swipe right and you'll find HTC BlinkFeed. You can customize HTC BlinkFeed to show posts from your social networks, headlines from your favorite news media, and more. For details, see <http://www.htc.com/support/apps/blinkfeed/>.
- Swipe left and you'll discover space for adding your favorite widgets, apps, and more so they're just a tap away. You can also add panels. For details, see [Adding or removing a widget panel](#) on page 65.
- You can change the apps on the launch bar at the bottom of the Home screen. See [Launch bar](#) on page 67.

While you're in another screen or app, press  to return to the last Home screen you visited.

Sleep mode

Sleep mode saves battery power by putting HTC Phone into a low power state while the display is off. It also stops accidental button presses when HTC Phone is in your bag.

Switching to Sleep mode

To turn off the display and switch to Sleep mode, briefly press the POWER button. You can also double-tap the lock screen.

HTC Phone also automatically goes into Sleep mode when it's left idle for a while. You can change the time before HTC Phone sleeps by setting the screen timeout. For details, see [Setting when to turn off the screen](#) on page 160.

Waking up from Sleep mode

- Press the POWER button.
- Use Motion Launch to wake up and unlock your phone directly to an app or screen. See [Motion Launch](#) on page 42.

Lock screen

Here's what you can do on the Lock screen:

- Swipe up on the lock screen to unlock the screen. Or, press and hold the fingerprint sensor.
- Tap twice on a notification to go directly to the related app.
- Swipe left or right on the notification to remove it.
- Slide left or right on a notification until you see ⌚ and ⚙️. Tap ⌚ to snooze the notification.
- Press and hold a notification to mute or block notifications from the related app. Tap **More settings** to customize the notification settings.

If you don't want notification content to appear on the lock screen, go to **Settings > Security & Location > Lock screen preferences > On the lock screen**, and then tap **Don't show notifications at all**.

- If you want to set up a screen lock or Smart lock, see [Setting a screen lock](#) on page 164 for details.

Motion gestures

Use motion gestures to mute HTC Phone, lower the ring volume, and more.

Lift phone to auto answer a call

To automatically answer an incoming call, lift the phone and look at the screen first to see who's calling before you hold it to your ear.

You can turn this feature on or off. In **Settings > Call**, select or clear **Auto answer calls**.

Flip to mute

If your phone is facing up when a call comes in, turn the phone over to mute it.

Go to Settings and then tap **Sound** or **Sound & notification**. Tap **Advanced > Flip to mute**, and you can set your phone to:

Mute once	Mute only once after flipping the phone. While the phone is still facing down, it will ring again when there are other incoming calls.
Mute always	After flipping the phone to mute a call, keep it always muted while it's still facing down when there are other incoming calls.

Pick up to lower volume

In a business meeting or restaurant, pick HTC Phone up when a call comes in to lower the ring volume automatically.

You can turn this feature on or off. Go to **Settings**, tap **Sound** or **Sound & notification**. Tap **Advanced**, and then tap the Quiet ring on pickup **On/Off** switch.

Increase ring volume automatically while phone is in your pocket or bag

Pocket mode makes HTC Phone recognize when your phone is in your bag or pocket and raise the ring volume so that you can hear it in noisy environments.

You can turn this feature on or off. Go to **Settings**, tap **Sound** or **Sound & notification**. Tap **Advanced**, and then tap Pocket mode **On/Off** switch.

Rotate HTC Phone for a better view

For many screens, you can automatically change the screen orientation from portrait to landscape by turning HTC Phone sideways.

When entering text, you can turn HTC Phone sideways to bring up a bigger keyboard.

Touch gestures

Use touch gestures to get around the Home screen, open apps, scroll through lists, and more.

Tap

Tap the screen with your finger when you want to select onscreen items such as application and settings icons, or press onscreen buttons.

Press and hold

To open the available options for an item (for example, a contact or link in a webpage), just press and hold the item.

Swipe or slide

Quickly swipe your finger horizontally across the screen to go to other Home screen panels. Swipe vertically to scroll through a list, document, and more.

Drag

Press and hold your finger with some pressure before you start to drag. While dragging, don't release your finger until you have reached the target position.

Flick

Flicking the screen is similar to swiping, except that you need to swipe your finger in light, quicker strokes, such as when moving right and left on the Home screen, or flicking through a contacts or message list.

Press and flick

On the Home screen, you can easily move a widget or icon from one screen to another.

Press and hold the widget or icon with one finger, and flick the screen to the new location with another finger.

Slide with two fingers

In some apps, slide two fingers apart to zoom in when viewing a picture or text.

Slide two fingers together to zoom out of the picture or text.

Two-finger swipe

Swipe down from the status bar using two fingers to access Quick Settings.

Three-finger swipe

- Swipe up the screen with three fingers and HTC Connect™ streams music or video from HTC Phone to your speakers or TV respectively. You can also share streaming media from apps such as YouTube®.
- Swipe down to disconnect from your speakers or TV.

Media gesture is turned on in Settings by default, which makes the three-finger gesture work for sharing media.

Getting to know your settings

Want to change the ringtone, set up a Wi-Fi® connection, or add your accounts? Do this and more in Settings.

1. Open Settings from the Apps screen or Notifications panel:

- From the Home screen, swipe up and then find and tap **Settings**.
- From the Home screen, tap , and then find and tap **Settings**.
- Swipe down from the top of the screen and then tap .

2. Here are some of the basic settings you can change:

- Tap **Network & Internet** to connect and configure your Wi-Fi and data connection, check your data usage, turn your phone into a Wi-Fi hotspot, and more.
- Tap **Display & gestures** to change the wallpaper, adjust the font and display size, set a screen saver, and more.
- Tap **Sound** to change the ringtone, decide if sound and vibration occur when interacting with the phone, set Do not disturb preferences, and more.
- Tap **Security & Location** to help secure your phone, choose lock screen preferences, set your location option, and more.
- Tap an item under Suggestions to check out new or recommended settings to customize.

Tap in Settings to quickly find options and settings.

Using Quick Settings

In the Quick Settings panel, easily turn settings such as Wi-Fi and Bluetooth® on or off.

1. Swipe down from the top of the screen to open the Notifications panel.

Right below the status bar, you'll see the short Quick Settings bar.

2. To see the full Quick Settings panel, do any of the following:
 - On the lock screen, swipe down once from the top of the screen.
 - On any other screen, swipe down once with two fingers or swipe down twice with one finger from the status bar.
 - With the short Quick Settings bar opened, tap ▼
3. Swipe left or right to see more tiles.
4. To turn a setting on or off, just tap its tile.

Customizing Quick Settings

You can remove, replace, or rearrange the tiles in Quick Settings.

1. With two fingers, swipe down from the top of the screen to open Quick Settings.

2. Tap  and do one of the following:
 - Press and hold a tile, and then drag it to your desired position.
 - Press and hold a tile, and then drag it down under the Drag to add tiles section to hide it from the Quick Settings panel.
 - Under the Drag to add tiles section, drag a tile up to show it in the Quick Settings panel.
3. Press .

There is a limit to the number of tiles that can be shown in the first panel of Quick Settings. You may need to swipe left on the Quick Settings panel to see more Quick Settings tiles.

Travel mode

Do you often travel across time zones? Turn on Travel mode in Settings to see a dual clock on the Home screen and lock screen that shows both your home and current time zones.

- Make sure you turn on location services in your phone settings.
- Set your home time zone first in the Clock app.

1. From the Home screen, swipe up and then tap **Settings** > **System** > **Date & time**.
2. Tap the Travel mode **On/Off** switch to turn travel mode on or off.

You'll see a dual clock of your home and current locations once your phone detects a different time zone from the home time zone you've set.

Restarting HTC Phone (Soft reset)

If HTC Phone is running slower than normal, is unresponsive, or has an app that is not performing properly, try rebooting and see if that helps solve the problem.

1. If the display is off, press the **POWER** button to turn it back on.
2. Press and hold the **POWER** button, and then tap **Restart**.

HTC Phone not responding?

If HTC Phone does not respond when you touch the screen or press the buttons, you can still restart it.

Press and hold the **POWER** and **VOLUME DOWN** until your phone vibrates, and then release the buttons.

You may need to press and hold the buttons for 12 to 15 seconds before the phone vibrates.

Notifications

Notification LED

The notification LED shows a:

- Solid green light when HTC Phone is connected to the power adapter or a computer and the battery is fully charged.
- Flashing green light when you have a pending notification.
- Solid orange light when the battery is being charged.
- Flashing orange light when the battery level reaches very low.

HTC Confidential 20180126
For Certification

Notifications panel

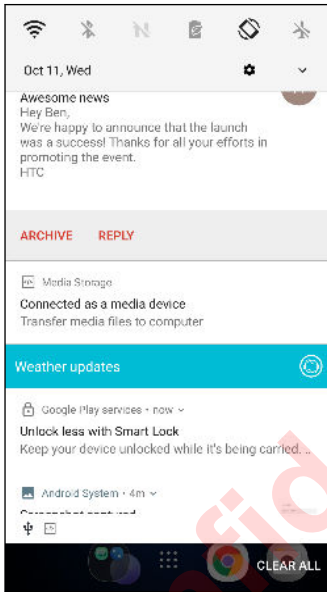

Notification icons inform you of new messages, calendar events, alarms, and activities in progress such as files downloading.

When you see notification icons, open the Notifications panel to check out details of the notifications that you've received.

To open the Notifications panel, slide down from the top of the screen.

Or just swipe down anywhere on the Home screen.

- Tap the notification to open the corresponding app.
- To dismiss just one notification in the list, drag it left or right.
- Slide two fingers apart on the notification to expand it and see more details or see if there are more notifications bundled inside it. Slide two fingers together on the notification to minimize it again.
- Some notifications allow you to take immediate action. For example, tap a missed call notification to return the call or reply with a text message.
- If you have several notifications, scroll through the list screen to see them all.
- To dismiss all non-persistent notifications, tap **Clear all**.
- You can change what app notifications you want to receive and also snooze some notifications to temporarily remove them. See [Managing app notifications](#) on page 42.

Managing app notifications

You can choose which types of app notifications to mute, block, or override your Do Not disturb settings.

1. From the Home screen, swipe up and then tap **Settings > Apps & notifications**.
2. Tap **Notifications > Notifications**, and then tap the app whose notifications you want to customize.

You can also press and hold a notification in the Notifications panel or the lock screen to see the notification settings you can customize.

3. Tap the **On/Off** switch next to option you want to toggle.

Settings for app notifications are applied to notifications in the Notifications panel and the lock screen.

Snoozing notifications

You can snooze notifications to temporarily remove them from the status bar and notifications panel.

1. Swipe down from the top of the screen to open the Notifications panel.
2. Slide the notification slowly to the right or left, and then tap .
3. Tap  then choose how long you want to snooze the notification.

The snoozed notification shows up again on the status bar and notifications panel as soon as the snooze time ends.

Turning icon badges on or off

Some apps may show a dot when they have notifications, You can choose to show or hide the dot on the app icons.

1. From the Home screen, swipe up and then tap **Settings > Apps & notifications**.
2. Tap **Notifications**.
3. Tap the **On/Off** switch next to the **Allow icon badges** option to turn it on or off.

Motion Launch

Motion Launch is a combination of a motion gesture followed by a finger gesture. Using a combination of simple gestures, you can wake up to your Home screen, HTC BlinkFeed, and more.

See the following:

- [Waking up to the lock screen](#) on page 43
- [Waking up and unlocking](#) on page 43
- [Waking up to the Home widget panel](#) on page 44

- [Waking up to HTC BlinkFeed](#) on page 44
- [Launching the camera](#) on page 45

Turning Motion Launch gestures on or off

1. From the Home screen, swipe up and then tap **Settings** > **Display & gestures**.
2. Tap **Advanced** > **Motion Launch gestures**.
3. Select the Motion Launch gestures you want.

Waking up to the lock screen

Go from sleep mode to the lock screen without pressing the POWER button.

If you've set up a screen lock with credentials, you'll be asked to provide your credentials first before HTC Phone unlocks.

1. Lift the phone in portrait orientation.
2. Immediately double-tap the screen.

Waking up and unlocking

Go from sleep mode and unlock HTC Phone to the last screen you were using without pressing the POWER button.

If you've set up a screen lock with credentials, you'll be asked to provide your credentials first before HTC Phone unlocks.

1. Lift the phone in portrait orientation.
2. Immediately swipe up from the bottom half of the screen.

Waking up to the Home widget panel

Go from sleep mode to the Home widget panel without pressing the POWER button.

If you've set up a screen lock with credentials, you'll be asked to provide your credentials first before HTC Phone unlocks.

1. Lift the phone in portrait orientation.
2. Immediately swipe left from the right side of the screen.

Waking up to HTC BlinkFeed

Go from sleep mode to HTC BlinkFeed without pressing the POWER button.

If you've set up a screen lock with credentials, you'll be asked to provide your credentials first before HTC Phone unlocks.

1. Lift the phone in portrait orientation.
2. Immediately swipe right from the left side of the screen.

Launching the camera

Go from sleep mode to the Camera app without pressing the POWER button.

1. Lift the phone in portrait orientation.
2. Immediately swipe down twice on the screen.

If you've set up a screen lock with credentials, you'll be asked to provide your credentials when you exit the Camera app.

Selecting, copying, and pasting text

1. Press and hold on a word.
2. Drag the start and end anchors to highlight the text you want to select.
3. Tap **Copy**.
4. In a text entry field (for example, while composing an email), press and hold at the point where you want to paste the text.
5. Tap **Paste**.

Sharing text

1. After you have selected the text, tap **Share**.
2. Choose where to share the selected text.

Capturing your phone's screen

Want to show off your high game score or write a blog post about HTC Phone features? It's easy to take a picture of the screen to share.

1. Do one of the following:
 - Press and hold **POWER** and **VOLUME DOWN** at the same time.
 - On the Navigation Bar, tap . See [Navigation Bar](#) on page 29
2. Tap **Share**.

To check your screenshot, open the Notifications panel, and then slide two fingers apart on the Screenshot captured notification.

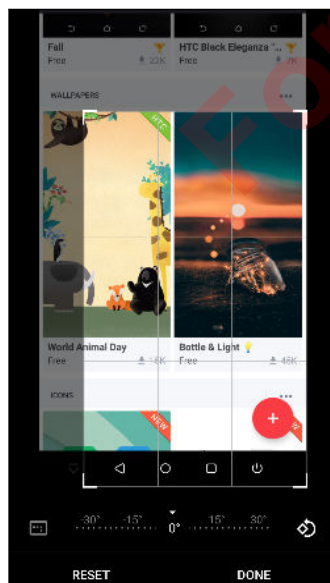

Capturing a partial screenshot

Just keep the part of the screenshot you need before sharing or saving it.

1. On the screen you want to capture, do one of the following:
 - Press and hold **POWER** and **VOLUME DOWN** at the same time.
 - On the Navigation Bar, tap . See [Navigation Bar](#) on page 29.

The phone captures the screen.

2. At the bottom of the screen, tap **Partial**.
3. On the screenshot, drag the corners or sides to crop the screenshot. To revert the screenshot to its original state, tap **Reset**.

4. When finished, tap **Done**.
5. Tap **Edit** to draw or enter text on the screenshot.
6. Tap **Share** or **Save**.

Capturing a scrolling screenshot

Capture that long message thread, webpage, or article as one screenshot.

1. On the screen you want to capture, do one of the following:
 - Press and hold **POWER** and **VOLUME DOWN** at the same time.
 - On the Navigation Bar, tap . See [Navigation Bar](#) on page 29.

The phone captures the screen.

2. At the bottom of the screen, tap **Scroll**.
3. Keep tapping **Scroll** to continue capturing the remaining screen content.

Check the thumbnail to have an idea of how long the screenshot is.

4. Tap **Edit** to draw or enter text on the screenshot. When drawing, drag your finger on the scroll bar to scroll up and down the screenshot.

5. When finished, tap **Share** or **Save**.

Recording the phone screen

Share your gameplay or capture a walk-through to show a friend how to level up or use a phone feature.

1. On the screen where you want to start recording, tap  on the Navigation Bar.

- If this is your first time to do a screen recording, you may need to tap **Start Now** to start recording.
- If you do not see  on the Navigation Bar, see [Customizing the Navigation Bar](#) on page 30.

2. Perform the steps that you want to record on the phone. While recording, you can:

- Tap  to pause recording. Tap  to resume recording.
- Tap  to show the screen recording controls.
- Drag  to reposition it on the screen.

The screen recording controls and  will be captured as well so move them to an area on the screen where they won't be a distraction.

3. When you're finished, tap .
4. Open the Notifications panel, and then slide two fingers apart on the Screen recorded notification.
5. Tap **Share**.

Entering text

The keyboard becomes available when you tap a text field in an app.

- Tap the keys on the onscreen keyboard to enter letters and numbers, as well as punctuation marks and symbols.
- Tap  to enter an uppercase letter. Tap twice to turn on caps lock.
- Press and hold keys with gray characters at the top or bottom to enter numbers, symbols, or accented letters. Some keys have multiple characters or accents associated with them.
- Tap **12#** to show number and symbol keys. Tap **abc** to return to the main keyboard.
- Tap  to choose from a wide selection of emojis.
- Tap  to check out more features, options, and settings. You can resize the keyboard space, change the layout and design, download dictionaries, and more.
- Press  to close the onscreen keyboard.

Entering text by speaking

1. Tap an area where you want to enter text.
2. On the onscreen keyboard, press and hold .

3. When you see the microphone button and the words "Speak now", say the words you want to enter.
4. Enter punctuation marks by saying the name. For example, say "comma".

Enabling smart keyboard options

Turn on the keyboard's advanced features to help you type faster, such as contextual prediction, auto-correction, and more.

1. From the Home screen, swipe up and then tap **Settings > Language & keyboard**.
2. Tap **Virtual keyboard > TouchPal - HTC Sense Version > Smart input**.
3. Select the options to enable.

How can I type faster?

The onscreen keyboard of your phone is highly customizable. You can modify its settings and options to enhance your typing experience.

Here are some tips that you could try:

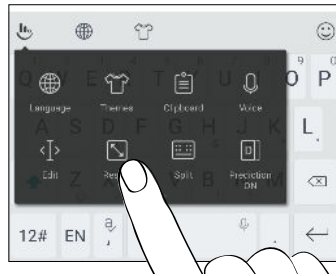

- **Show the numeric keys on the top row of the keyboard.** Go to Settings, and then tap **Language & keyboard**. Tap **Virtual keyboard > Touchpal - HTC Sense Version > General settings**. Select **Number Row**.
- **Turn on Contextual prediction.** Go to Settings, and then tap **Language & keyboard**. Tap **Virtual keyboard > TouchPal - HTC Sense Version > Smart input**, and then make sure that **Contextual prediction** is selected. This option enables next word prediction and will also allow the keyboard to learn from the usual word patterns you type for better word suggestions.

- **Switch to landscape mode.** With two fingers, swipe down from the status bar and check if **Auto rotate** is turned on. Open the app you need, and then tap a text field to show the keyboard. Turn your phone sideways to bring up a bigger keyboard.

You can then tap  > **Split**.

- **Resize or reposition the keyboard.**

Open the app you need, and then tap a text field to show the keyboard. Tap , and then tap **Resize**. Drag any of the border arrows to resize your keyboard.

To move the keyboard up, drag the center button up.

Getting help and troubleshooting

Want some quick guidance on your phone?

Check out the friendly walkthroughs and the FAQs in the Help app to learn how to use your phone.

- When you see a Help tile in HTC BlinkFeed, just tap the tile to know more about the tip.
- From the Home screen, swipe up and then find and tap **Help**.

You can then tap **Search help articles & videos**, and enter what you're looking for. Or you can tap  to browse how-tos, FAQs, and more.

If HTC Help is not preinstalled on your phone, you can download it from Google Play Store.

Having hardware or connection problems?

Before calling for support, you can first use the Help app to troubleshoot or perform diagnostics on your phone. This helps you in finding the problem cause, and in determining whether you can resolve the problem or you need to call for support.

1. From the Home screen, swipe up and then find and tap **Help**.
2. On the Help screen, tap **≡** and then tap **Troubleshooting** or **Diagnostics tools** to use a troubleshooting wizard to check the basic hardware functions.
3. You can also tap **Software updates** to check for new software updates if available. Software updates may contain bug fixes and feature improvements.
