Warm tip:

This product uses 5V power supply, audio input for 3.5mm universal audio interface, through the speakers knob to adjust the volume size.

Reminder:

- 1、Speaker power supply is 5V, audio input is 3.5mm universal audio interface.
- 2、When the speakers are used and placed, should be placed in a cool and dry environment, not in humid places, not close to high temperature objects, when placed, please pay attention to anti fall
- 3、This machine adopts DC 5V power supply, it is connected with USB thread head, and can not use too high or low voltage. This machine only supports 3.5 mm universal audio interface as input, other audio input interface is not supported.
- 4、Please don't open the rear shell at will. If it needs repairing, please send it to our company or professional maintenance staff

FCC Caution:

This device complies with part 15 of the FCC Rules. Operation is subject to the following two conditions:
(1) This device may not cause harmful interference, and
(2) this device must accept any interference received, including interference that may cause undesired operation. Any changes or modifications not expressly approved by the party responsible for compliance could void the user's authority to operate the equipment.

NOTE:

This equipment has been tested and found to comply with the limits for a Class B digital device, pursuant to Part 15 of the FCC Rules. These limits are designed to provide reasonable protection against harmful interference in a residential installation. This equipment generates, uses and can radiate radio frequency energy and,

if not installed and used in accordance with the instructions, may cause harmful interference to radio communications. However, there is no guarantee that interference will not occur in a particular installation.
If this equipment does cause harmful interference to radio or television reception, which can be determined by turning the equipment off and on, the user is encouraged to try to correct the interference by one or more of the following measures:
-- Reorient or relocate the receiving antenna.
-- Increase the separation between the equipment and receiver.
-- Connect the equipment into an outlet on a circuit different from that to which the receiver is connected.
-- Consult the dealer or an experienced radio/TV technician for help.
The device has been evaluated to meet general RF exposure requirement. The device can be used in portable exposure condition without restriction.
