

Intel® Wi-Fi 6 AX211

Label info:

FCC ID: PD9AX211D2H
IC: 1000M-AX211D2H

The device is considered to be too small for the label since it is impracticable to label with a font size that is four-points or larger. The FCC ID is instead placed in the users manual as allowed by KDB 784748.

Doug Noble

Subject: RE: Label Permission Request

Good Day Tim,

Label exemption would be acceptable for this device. Please place the label information in accompanying literature.

Regards,

Subject: Label Permission Request

Intel submitted and application to ACB in December. For the labeling exhibit they submitted the label with an explanation that the form factor has been accepted in the past by ISED. ISED asked for us to provide Intels previous correspondence in order to proceed as well as something denoting appropriate sizes and the application has been in pass back since December.

Our contact at Intel is fairly certain ISED has granted them permission in the past on this form factor, but has not had the time to investigate and provide the past proof and is currently "buried" in other priorities. Therefore on their behalf we are submitting the attached and requesting permission for the labeling to be placed into the manual based on the information provided.

They use the basic form factor for many devices and have several upcoming approvals based on the same form factor (known as D2 to Intel) as well. If possible we would like to obtain permission for Intel to place the labeling in the manual for all certifications that they use this particular form factor.

Could ISED please review the attached and provide feedback as appropriate?

Thank You,

Timothy R. Johnson, iNARTE Certified EMC Engineer (No. EMC-002205-NE) and Wireless Device
