Subject: Class II Permissive Change TCB Certification Application for Class B Computing Device Peripheral
/ FCC ID: A3KM104 / Philips 17" Color LCD Monitor, Model 170S2

Gentlemen:

Enclosed, please find Philips Electronics Industries (Taiwan) Ltd.'s Class II Change application for equipment authorization dated February 22, 2002. The subject device was originally granted on September 4, 2002 in compliance with Part 15, Subpart B of the FCC Rules.

The original application filing reported 17" Color Flat Panel LCD Monitor, which supported 30-82 kHz horizontal and 56-75 Hz vertical sync frequencies with maximum resolution up to 1280x1024, Non-Interlaced. This monitor was provided with: (1) detachable non-shielded power supply cord; (3) D-Sub analog and DVI digital interface terminals; and (3) detachable shielded 15-Pin D-Sub and DVI video signal interface cables with two external ferrite cores. This filing did not include future optional USB powered hub base unit, as it was not yet available.

This Class II Change is to report: (1) new model number and new cabinet enclosure; (2) deleted DVI digital interface terminal and associated DVI video signal interface cable; and (3) deleted multimedia base unit.

The changed monitor was system tested in accordance with C63.4-1992 to show compliance with FCC Part 15 Class B limits. Compliance tests were performed in representative worst-case video modes 1024x1024 @ 80 kHz and 1024x768 @ 60 kHz.

Should you have any questions or comments, please contact the undersigned who is an authorized agent for the subject application. Thank you for your attention and cooperation in this matter.

Sincerely yours,

Richard Mullen
