Press down to open the cover

In order to obtain a more stable and better experience, it is recommended to use mobile phones with Android 6.0, iOS 10.0 or higher OS versions.

How to power on and pair the earphones (step 1)

Power on:

Method 1: Take out the earphones from the stand, they will start up automatically and enter the pairing mode (make sure the stand is charged).

Method 2: Touch the button of the earphone to turn it on (the earphones must not be in the charging case and must be off).

An illustration of a person sitting at a desk, interacting with a stand. The stand has a circular base and a vertical column with a button on top. The person is reaching up to press the button. The stand is connected to a device on the desk.

How to power on and pair the earphones (step 2)

Pairing of the main earphone:

Turn on your phone's Bluetooth, search for "PMAU-Quid L" in the available device list, and click on it to complete the pairing of the main earphone.

How to wear

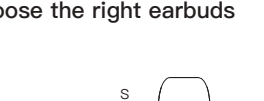

Wearing manner for the left earpiece

Wearing manner for the right earpiece

In order to obtain better noise reduction effect, you can adjust the angle after wearing the earplugs, so that the earplugs fit snugly and firmly in your ears.

Choose the right earbuds

The diagram illustrates the selection of earbud sizes. On the left, three earbud sizes are shown: S (Small), M (Medium), and L (Large). Each size is represented by a small, semi-circular earbud. To the right, a side view of a human ear is shown with the earbuds inserted. The earbuds are labeled S, M, and L, indicating their respective sizes. The earbuds are shown in a way that demonstrates how they would fit into the ear canal.

Earbuds with appropriate sizes are of great importance to the noise reduction experience, sound quality and comfort. Our earphones are equipped with S, M and L earbuds (M earbuds are installed on the earphones), please try on different sizes of earbuds and choose

Mobile charger

The phone will automatically turn off and start charging when it is placed in the stand.

How to use the wireless charger

The diagram illustrates the components of the wireless charging system. A circular device, which is the wireless charger, is shown resting on a circular base, which is the wireless charging area. The device has a battery indicator on its top edge. The base is labeled as the wireless charging area.

FCF Caution:

Any changes or modifications not expressly approved by the party responsible for compliance could void the user's authority to operate the equipment.

This device complies with part 15 of the FCC Rules. Operation is subject to the following two conditions: (1) The device may not cause harmful interference, and (2) this device must accept any interference received, including interference that may cause undesired operation.

IMPORTANT NOTE:

Now, the equipment has been tested and found to comply with the limits for a Class B digital device, pursuant to part 15 of the FCC Rules. These limits are designed to provide reasonable protection against harmful interference in a residential installation. This equipment generates, uses and can radiate radio frequency energy and, if not installed and used in accordance with the instructions, may cause harmful interference to radio communications. However, there is no guarantee that interference will not occur in a particular installation. If this equipment does cause harmful interference to radio or television reception, which can be determined by turning the equipment off and on, the user is encouraged to try to correct the interference by one or more of the following measures:

- Reorient or relocate the receiving antenna.
- Increase the separation between the equipment and receiver.
- Connect the equipment into an outlet on a circuit different from that to which the receiver is connected.
- Consult the dealer or an experienced radio/TV technician for help.

FCC Radiation Exposure Statement:

This equipment complies with FCC radiation exposure limits set forth for an uncontrolled environment .
