

## Radio frequency radiation exposure evaluation: portable devices

**RESULT :**

**Pass**

### Test Specification

|                           |                                                                      |
|---------------------------|----------------------------------------------------------------------|
| Test item                 | : SKIBIDI TOILET DELUXE RC                                           |
| Identification / Type No. | : 1393                                                               |
| FCC ID                    | : 2AWAUSKTRC1393T                                                    |
| Test standard             | : CFR47 FCC Part 2: Section 2.1093<br>FCC KDB Publication 447498 D04 |

### Measurement Record:

E.I.R.P =  $90.57 - 95.2 = -4.63\text{dBm}$

Since maximum peak output power of the transmitter is  $-4.63\text{dBm} \approx 0.344\text{mW} < 3\text{ mW}$ .

Hence the EUT is excluded from SAR evaluation according to FCC KDB Publication 447498 D04
