RE: Application for Limited Modular Approval Certification for BT-20 Bluetooth Module

Dear Sir or Madam:

The following information addresses the requirements to support a limited modular approval as required by the FCC Public Notice DA 00-1407 "Part 15 Unlicensed Modular Transmitter".

1	The BT-20 Bluetooth module has been tested in the ML900 which does not provide shielding. The module does have grounding pins, but does not have a shielded cover.
2	The BT-20 Bluetooth module does have buffered data inputs.
3	The BT-20 Bluetooth module has its own power supply regulator. The module will be integrated in the ML900 which also offers power supply regulation.
4	The ML900 has a Bluetooth antenna that complies with section 15.203 of the FCC rules. The antenna is permanently attached (see attached antenna specifications).
5	This BT-20 Bluetooth module has not been tested standalone. It has been tested internal to the ML900 and it will always be integrated internal to the ML900.
6	The modular transmitter will be labeled as required. The ML900 will also be labeled as required.
7	Operational requirements have been added to the manual (refer to the User's Manual).
8	The ML900 has been classified as mobile. There will be a cautionary statement added to the manual stipulating the 20 cm separation distance (refer to the User's Manual).

If there are any additional questions or if further information is needed, please contact me at your earliest convenience at (847) 538-4968.

Sincerely,

A handwritten signature in black ink, appearing to read 'Steve Surwillo', written over a horizontal line.
