Subject: FCC ID:PIDMARCONI, more information

Dear Mr. Graff ,

Please find below our reply to your second message, dated March 30, 2001 .

- 1) The RF exposure information as a separate document - attached. Please advise.
- 2) For the statement about the professional installation and requirement with a separation distance at least 2 meters from all persons during normal operation - please refer to pages 2-3, 2-4, 3-3 of User Manual new version.
- 3) Our customer MARCONI prefers BSR and SPR to be determined as fixed category outdoor units with 2 m separation distance.

Many thanks for your assistance and patience.

Best regards ,

Marina
