WHAT'S INCLUDED

Wireless HDMI Dongle x 1

USB-C Power Supply Cable x 1

PRODUCT OVERVIEW

Pairing Button

HDMI Connector

USB-C Power Supply Port

STATUS INDICATORS

Insufficient Power Alert
(Solid: Insufficient power supply; Off: Normal)

Connection Status
(Blinking: Not connected; Solid: Connected)

Signal Status
(1 bar: Weak; 2 bars: Good; 3 bars: Strong)

Video Output Status
(Blinking: No output; Solid: Outputting)

CASTING

1

Plug the Dongle into your computer or any device with the HD video output function.

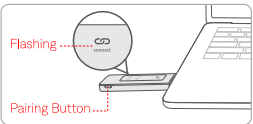

Note:

If the Dongle's power supply is insufficient (indicated by a solid "faults" light), connect it to a 5V/1A power supply using the provided power supply cable.

2

Press and hold the **Pairing Button** on the Dongle for 10 seconds to make it ready for pairing. The **connect** indicator on the Dongle will start flashing.

3

On the **ZIP** projector's **Homepage**, open the side menu by pressing the **OK** button on the projector, select **AirLink**, and **Confirm** when prompted.

4

Wait for the successful pairing prompt. The content from your device will appear on the projection surface.

Tips:

* To pause screen mirroring, press the **Pairing** button once. Press it again to resume.
* The above pairing process is only required for the first use. After that, plug the Dongle and press its pairing button once to start casting immediately.

FC

This device complies with part 15 of the FCC Rules. Operation is subject to the following two conditions:
(1) This device may not cause harmful interference, and (2) this device must accept any interference received, including interference that may cause undesired operation.

Note:

This equipment has been tested and found to comply with the limits for a Class B digital device, pursuant to part 15 of the FCC rules. These limits are designed to provide reasonable protection against harmful interference in a residential installation. This equipment generates, uses and can radiate radio frequency energy and, if not installed and used in accordance with the instructions, may cause harmful interference to radio communications. However, there is no guarantee that interference will not occur in a particular installation. If this equipment does cause harmful interference to radio or television reception, which can be determined by turning the equipment off and on, the user is encouraged to try to correct the interference by one or more of the following measures:
— Reorient or relocate the receiving antenna.
— Increase the separation between the equipment and receiver.
— Connect the equipment into an outlet on a circuit different from that to which the receiver is connected.
— Consult the dealer or an experienced radio/TV technician for help.

Important:

You are cautioned that changes or modifications not expressly approved by the party responsible for compliance could void the user's authority to operate the equipment.

Specific Absorption Rate (SAR) information

SAR tests are conducted using standard operating positions accepted by the FCC with the device transmitting at its highest certified power level in all tested frequency bands, although the SAR is determined at the highest certified power level, the actual SAR level of the device while operating can be well below the maximum value. Before a new model device is available for sale to the public, it must be tested and certified to the FCC that it does not exceed the exposure limit established by the FCC, tests for each device are performed in positions and locations as required by the FCC.
For body worn operation, this device has been tested and meets the FCC RF exposure guidelines when used with an accessory designated for this product or when used with an accessory that contains no metal and that positions the device a minimum of 5 mm from the body. Non-compliance with the above restrictions may result in violation of RF exposure guidelines.

Canada compliance statement / Conformité réglementaire canadienne :

This device complies with Innovation, Science and Economic Development Canada license-exempt RSS standard(s). Operation is subject to the following two conditions: (1) this device may not cause interference, and (2) this device must accept any interference, including interference that may cause undesired operation of the device.

Operation in the band 5150–5250 MHz is only for indoor use to reduce the potential for harmful interference to co-channel mobile satellite systems.

Exposure to radio frequency energy:
For body worn operation, this model device has been tested and meets the ICSED RF exposure guidelines when used with an accessory designated for this product or when used with an accessory that Contains no metal and that positions of the body minimum distance is 5 mm.

Le présent appareil est conforme aux CNR d'Innovation, Sciences et Développement économique Canada applicables aux appareils radio exempts de licence. L'exploitation est autorisée aux deux conditions suivantes : (1) l'appareil ne doit pas produire de brouillage, et (2) l'utilisateur de l'appareil doit accepter tout brouillage radioélectrique subi, même si le brouillage est susceptible d'en compromettre le fonctionnement.

La bande 5150–5250 MHz est réservée uniquement pour une utilisation à l'intérieur afin de réduire les risques de brouillage préjudiciable aux systèmes de satellites mobiles utilisant les mêmes canaux.
PMN-WD-TX01, TX02

L'exposition à l'énergie radiofréquence:
Pour le corps, ce modèle d'appareil a été testé et adapté à la RF renforcée Lignes directrices relatives à l'exposition lorsqu'elles sont utilisées avec un accessoire pour ce produit ou lorsqu'elles sont utilisées avec celui-ci Un accessoire ne contenant pas de métal et dont la distance minimale de la face est de 5 mm.
CAN ICES (B) / NMB (B)

CE

EU compliance statement :
Hereby, Shenzhen Neutop Optoelectronics Co., Ltd. declares that this radio equipment is in compliance with Directive 2014/53/EU. The full text of the EU declaration of conformity is available at the following internet address:
[https://aurzen.s3.us-west-1amazonaws.com/resource/doc/CastPlay_Declaration_of_Conformity.pdf](https://aurzen.s3.us-west-1.amazonaws.com/resource/doc/CastPlay_Declaration_of_Conformity.pdf)

The below radio frequency specification only apply to EU and UK regions:

	Frequency Range	Transmit Power (EIRP)
Wi-Fi 2.4G/BT	2400-2483.5MHz	<20dBm
	5150-5250MHz	<23dBm
Wi-Fi 5G	5725-5850MHz	<14dBm

Note:

— The portable device has been evaluated to meet general RF exposure requirement. It can be used in portable exposure condition without restriction.
— This device is restricted to indoor use when operating in the 5150 to 5250 MHz frequency range.

All products bearing this symbol are waste electrical and electronic equipment (WEEE as in directive 2012/19/EU) which should not be mixed with unsorted household waste. Instead, you should protect human health and the environment by handing over your waste equipment to a designated collection point for the recycling of waste electrical and electronic equipment, appointed by the government or local authorities. Correct disposal and recycling will help prevent potential negative consequences to the environment and human health. Please contact the installer or local authorities for more information about the location as well as terms and conditions of such collection points.

The symbol indicates class II equipment

The symbol indicates AC voltage

The symbol indicates DC voltage

For indoor use only

The exclamation point within an equilateral triangle is intended to alert the user to the presence of important operating and maintenance (servicing) instructions in the literature accompanying the appliance.
