

ALL TERRAIN DRIVING R/C CAR INSTRUCTIONS

1. Battery installation instructions of car and hand held remote control

THE CAR USE 1 X 7.4V BATTERY
(Include battery and USB charger)

Battery Installation for Vehicle

As shown above, insert the power interface correctly. First, put the wire on the left, then put the battery into the right side of battery compartment (Wiring port downward). Put the wire in again.

Notice: Only use the special charger for battery charging.

1. Open the vehicle's battery cover. Install the battery pack and connect to the vehicle.
2. Replace the battery cover and tighten screw with a screwdriver.

Fitting:

- ① USB charging wire X1
- ② 7.4V BATTERY X1

WARNING:
Please take out the battery if not used for a long time.

2. Operation instructions of remote control

FCC Warning

This device complies with part 15 of the FCC Rules. Operation is subject to the following two conditions: (1) This device may not cause harmful interference, and (2) this device must accept any interference received, including interference that may cause undesired operation.

Any Changes or modifications not expressly approved by the party responsible for compliance could void the user's authority to operate the equipment.

Note: This equipment has been tested and found to comply with the limits for a Class B digital device, pursuant to part 15 of the FCC Rules. These limits are designed to provide reasonable protection against harmful interference in a residential installation. This equipment generates uses and can radiate radio frequency energy and, if not installed and used in accordance with the instructions, may cause harmful interference to radio communications. However, there is no guarantee that interference will not occur in a particular installation. If this equipment does cause harmful interference to radio or television reception, which can be determined by turning the equipment off and on, the user is encouraged to try to correct the interference by one or more of the following measures:

- Reorient or relocate the receiving antenna.
- Increase the separation between the equipment and receiver.
- Connect the equipment into an outlet on a circuit different from that to which the receiver is connected.
- Consult the dealer or an experienced radio/TV technician for help.

The device has been evaluated to meet general RF exposure requirement. The device can be used in portable exposure condition without restriction.
