The following is in response to comments made on the above referenced application.

Regarding the ID Label, please clarify if it is printed on a label, or if it is etched or otherwise printed directly on the EUT's case. If on a label, please confirm that the label is expected to last the lifetime of the product (i.e., that it is durable), and that it will be permanently attached to the EUT (e.g., using a permanent adhesive).

The label drawings and detail provided are for a durable printed label that is permanently attached to the EUT using a permanent adhesive.
