

EXHIBIT 4 - TEST SETUP PHOTOGRAPHS

**Radiation Emission Test
Setup (Below 30MHz)**

**Radiation Emission Test
Setup (30MHz to 1GHz)**

Radiation Emission Test Setup (1GHz to 18GHz)	 A photograph of a radiation emission test setup for the frequency range 1GHz to 18GHz. The test chamber is lined with white, square-shaped anechoic absorbers. A white, rectangular test item is placed on a white, T-shaped stand in the center of the chamber. To the right, a red and white antenna is mounted on a stand, pointing towards the test item. The floor of the chamber is covered with blue, conical-shaped absorbers.
Radiation Emission Test Setup (Above 18GHz)	 A photograph of a radiation emission test setup for frequencies above 18GHz. The test chamber is lined with white, square-shaped anechoic absorbers. A white, rectangular test item is placed on a white, T-shaped stand in the center of the chamber. To the left, a metal stand with several vertical rods is visible. To the right, a blue cable is connected to a device. The floor of the chamber is covered with blue, conical-shaped absorbers.
