|  A photograph showing a laboratory setup for antenna port conducted RF measurements. A yellow signal generator is connected via a blue cable to a yellow spectrum analyzer. The spectrum analyzer's screen displays a frequency plot with a prominent peak. A yellow smartphone is held in a test fixture in the foreground. A white card with the number '12132753' is placed in front of the equipment. |  A photograph of a frequency stability measurement setup inside an anechoic chamber. A yellow smartphone is mounted on a wooden stand on a metal mesh table. Various cables and connectors are attached to the phone. A white card with the number '12132753' is visible on the table. The chamber's interior walls are lined with dark, pyramidal-shaped RF absorbers. |
