

June 18th, 2024

FCC ID: 2AYDI-MURABZ Product Name: SmartRock Long Range Applicant: Giatec Scientific Inc.

## **Class II Permissive Change**

Dear Examiner,

This is to request a Class II Permissive change for the SmartRock Long Range product family originally granted in May 2024.

The change under this application is to add the SmartRock Long Range product family with a change of the antenna type from the previous listing; rated with lower gain than the original. The transmitter module itself has not changed.

Sincerely,

Mustafa Salehi Sr. Director, Hardware Development
