<u>User's Manual</u> <u>CC3100MODR11MAMOB Module</u>

1. Introduction

The CC3100MODR11MAMOB module allows for Wi-Fi 802.11b/g/n communications from the Knox System to wireless networks to connect with the KnoxConnect[™] system using an Air802 external antenna.

It is built from a standard networking component acquired from a large semiconductor supplier to ensure a long-lifetime secure supply in support of Knox systems.

This CC3100MODR11MAMOB module is placed into the KeySecure 5 and KeySecure 6 on whose labels state "*This Device Contains: FCC ID: 2AOVI-KNOX-RAS and IC: 23479-KNOXRAS*".

2. Use

The CC3100MODR11MAMOB is only to be used with the Air802 antenna. This antenna has the following specifications:

AIR802

AIR802® model ANRD2405-RPSMA is a dipole or rubber duck style antenna for the 2.4 GHz band with 5 dBi gain. This antenna has a reverse polarity SMA (RP-SMA) plug-male connector.

Frequency	2400 - 2500 MHz
Gain	5 dBi
VSWR	2.0 : 1 Maximum
Polarization	Linear, Vertical
Horizontal Beam Width	360°
Impedance	50Ω
Max. Input Power	2 watts
Weight	0.044 lbs (20 grams)
Length	7.88 inches (200.3 mm)
Connector	Reverse Polarity SMA (RP-SMA) Plug-Male
Temperature	-10° to + 55°C (14° to 131°F)
Humidity	95% @ 25º C
Radome Color	Black
RoHS Compliant	Yes

The module interfaces with the antenna's reverse polarity SMA (RP-SMA) plug-male connector using a bulkhead connector to a six-inch type 1.13 coax cable that uses a RP-SMA plug-male connector on one end and the other attaches to the Printed Circuit Board Assembly using a female, right-angle U.FL connector. The bulkhead connector provides the ability to connect two devices with RP-SMA plug-male interfaces.

NOTE: The CC3100MODR11MAMOB is only certified to be used with the Air802 antenna. The user is expected to operate it only in this fashion. Changes or modifications not expressly approved by Knox Company voids the user's authority to operate the equipment.

The equipment that this module will go into complies with part 15 of the FCC Rules. Operation is subject to the following two conditions: (1) This device may not cause harmful interference, and (2) this device must accept any interference received, including interference that may cause undesired operation.

This Class B digital apparatus complies with Canadian ICES-003. Cet appareil numerique de la classe B est conforme a la norme NMB-003 du Canada.

Concerning EVMs Including Detachable Antennas: Under Industry Canada regulations, this radio transmitter may only operate using an antenna of a type and maximum (or lesser) gain approved for the transmitter by Industry Canada. To reduce potential radio interference to other users, the antenna type and its gain should be so chosen that the equivalent isotropically radiated power (e.i.r.p.) is not more than that necessary for successful communication. This radio transmitter has been approved by Industry Canada to operate with the antenna types listed in the user guide with the maximum permissible gain and required antenna impedance for each antenna type indicated. Antenna types not included in this list, having a gain greater than the maximum gain indicated for that type, are strictly prohibited for use with this device.

Concernant les EVMs avec antennes détachables Conformément à la réglementation d'Industrie Canada, le présent émetteur radio peut fonctionner avec une antenne d'un type et d'un gain maximal (ou inférieur) approuvé pour l'émetteur par Industrie Canada. Dans le but de réduire les risques de brouillage radioélectrique à l'intention des autres utilisateurs, il faut choisir le type d'antenne et son gain de sorte que la puissance isotrope rayonnée équivalente (p.i.r.e.) ne dépasse pas l'intensité nécessaire à l'établissement d'une communication satisfaisante. Le présent émetteur radio a été approuvé par Industrie Canada pour fonctionner avec les types d'antenne énumérés dans le manuel d'usage et ayant un gain admissible maximal et l'impédance requise pour chaque type d'antenne. Les types d'antenne non inclus dans cette liste, ou dont le gain est supérieur au gain maximal indiqué, sont strictement interdits pour l'exploitation de l'émetteur

General

The OEM should not provide information to the end user regarding installation or removal of this RF module or information on how to change RF related parameters in the user manual of the end product.

The OEM integrator is still responsible for testing their end-product for any additional compliance requirements required with this module installed (for example, digital device emissions, PC peripheral requirements, etc.).

"Finished Product Labelling

This Module is labelled with its own US and Canada Certification numbers. If the certification numbers cannot be seen while installed inside the finished product, then the finished product must display the label on it referring to the module. In that case, the finished product must be permanently labelled on the exterior of the product with wording such as the following*:

"Contains Transmitter Module FCC ID: 2AOVI-KNOX-RAS" OR "Contains FCC ID: 2AOVI-KNOX-RAS".

"Contains Transmitter Module IC: 23479-KNOXRAS" OR "Contains IC: 23479-KNOXRAS".

* Or similar text which conveys the same meaning.

This device complies with part 15 of the FCC Rules. Operation is subject to the following two conditions: (1) This device may not cause harmful interference, and (2) this device must accept any interference received, including interference that may cause undesired operation.

** If the product is too small to include the above statement, it may be placed in the user's manual.

The following warnings must also be placed in the User Manual of the finished product using this module:

This device complies with part 15 of the FCC Rules. Operation is subject to the following two conditions: (1) This device may not cause harmful interference, and (2) this device must accept any interference received, including interference that may cause undesired operation.

Changes or modifications not expressly approved by the party responsible for compliance could void the user's authority to operate the equipment.

This device complies with Industry Canada licence-exempt RSS standard(s). Operation is subject to the following two conditions: (1) this device may not cause interference, and (2) this device must accept any interference, including interference that may cause undesired operation of the device.

Le présent appareil est conforme aux CNR d'Industrie Canada applicables aux appareils radio exempts de licence. L'exploitation est autorisée aux deux conditions suivantes : (1) l'appareil ne doit pas produire de brouillage, et (2) l'appareil doit accepter tout brouillage radioélectrique subi, même si le brouillage est susceptible d'en compromettre le fonctionnement.

For a Class A digital device or peripheral, place the following warning:

Note: This equipment has been tested and found to comply with the limits for a Class A digital device, pursuant to part 15 of the FCC Rules. These limits are designed to provide reasonable protection against harmful interference when the equipment is operated in a commercial environment. This equipment generates, uses, and can radiate radio frequency energy and, if not installed and used in accordance with the instruction manual, may cause harmful interference to radio communications. Operation of this equipment in a residential area is likely to cause harmful interference in which case the user will be required to correct the interference at his own expense.

For a Class B digital device or peripheral, place the following warning:

Note: This equipment has been tested and found to comply with the limits for a Class B digital device, pursuant to part 15 of the FCC Rules. These limits are designed to provide reasonable protection against harmful interference in a residential installation. This equipment generates, uses and can radiate radio frequency energy and, if not installed and used in accordance with the instructions, may cause harmful interference to radio communications. However, there is no guarantee that interference will not occur in a particular installation. If this equipment does cause harmful interference to radio or television reception, which can be determined by turning the equipment off and on, the user is encouraged to try to correct the interference by one or more of the following measures:

-Reorient or relocate the receiving antenna.

-Increase the separation between the equipment and receiver.

-Connect the equipment into an outlet on a circuit different from that to which the receiver is connected.

If the antenna used in the finished product is detachable or user serviceable then the following must be included:

This radio transmitter IC: 23479-KNOXRAS has been approved by Industry Canada to operate with the antenna types listed below with the maximum permissible gain and required antenna impedance for each antenna type indicated. Antenna types not included in this list, having a gain greater than the maximum gain indicated for that type, are strictly prohibited for use with this device.

Le présent émetteur radio IC: 23479-KNOXRAS a été approuvé par Industrie Canada pour fonctionner avec les types d'antenne énumérés ci-dessous et ayant un gain admissible maximal et l'impédance requise pour chaque type d'antenne. Les types d'antenne non inclus dans cette liste, ou dont le gain est supérieur au gain maximal indiqué, sont strictement interdits pour l'exploitation de l'émetteur.

Antenna: AIR802 model ANRD2405-RPSMA 5dBi Whip

RF Exposure statement

The antenna used for this transmitter must be installed to provide a separation distance of at least 20 cm from all persons and must not be co-located or operating in conjunction with any other antenna or transmitter. Only the following antenna is approved to be used with this module: 5 dBi gain Whip Antenna.
