

Solder Board-Component View 4	 A photograph showing a small, rectangular black component with four gold-colored solder points. The component is placed on a blue textured surface. A black ruler with white markings is positioned below the component, showing measurements in millimeters. The ruler has markings for 10, 20, 30, 40, 50, 60, 70, 80, and 90 mm.
Solder Board-Component View 5	 A photograph showing a small, rectangular black component with four gold-colored solder points. The component is placed on a blue textured surface. A black ruler with white markings is positioned below the component, showing measurements in millimeters. The ruler has markings for 10, 20, 30, 40, 50, 60, 70, 80, 90, 100, and 110 mm. Above the component, a white ribbon cable with a yellow stripe is visible, connected to a larger black component.

Solder Board-Component View 6	 A photograph showing a small electronic component, likely a USB-to-TB converter, soldered onto a blue PCB. The component has a USB-A connector on one side and a TB connector on the other. It is positioned next to a black ruler with white markings for scale. The ruler shows measurements in millimeters (mm) and centimeters (cm).
Solder Board-Component View 7	 A photograph showing the same electronic component as in View 6, but from a different angle. The component is soldered onto a blue PCB. It features a USB-A connector and a TB connector. A black ruler with white markings is placed next to it for scale. The ruler shows measurements in millimeters (mm) and centimeters (cm).

Solder Board-Component View 8	 A photograph of a small, rectangular printed circuit board (PCB) component, labeled '8', mounted on a blue textured surface. The component is populated with various electronic components, including integrated circuits, resistors, and capacitors. It is connected to a multi-colored ribbon cable. A black ruler with white markings is placed horizontally below the component, showing measurements in millimeters (mm) and centimeters (cm).
Solder Board-Component View 9	 A photograph of a small, rectangular printed circuit board (PCB) component, labeled '9', mounted on a blue textured surface. The component features a prominent circular copper coil in the center, likely for an inductor or transformer. It is connected to a multi-colored ribbon cable. A black ruler with white markings is placed horizontally below the component, showing measurements in millimeters (mm) and centimeters (cm).

Solder Board-Component View 10	 A photograph showing a small black rectangular component with a circular silver pad on its top surface. The component is placed on a blue textured surface next to a black ruler with white markings. The ruler shows measurements in millimeters (0 to 100 mm) and centimeters (0 to 10 cm). The component is oriented vertically, with the circular pad at the top.
Antenna View	 A photograph showing the internal components of a device, including a green printed circuit board (PCB) and a black plastic housing. A circular silver pad, identified as the Wireless Charger Antenna, is highlighted with a red box. A red line points from the text "Wireless Charger Antenna" to the antenna. The device is placed on a blue textured surface next to a black ruler with white markings. The ruler shows measurements in millimeters (0 to 100 mm) and centimeters (0 to 10 cm). The device is oriented horizontally, with the antenna on the left side.

Antenna View	 Wireless Charger Antenna This photograph shows the back of a smartphone with its black plastic cover removed, revealing the internal components. A red rectangular box highlights the wireless charger antenna, which is a large, rectangular, copper-colored coil. The antenna is connected to a small yellow component. A black ruler with white markings is placed horizontally below the phone, and a blue textured surface is visible in the background.
