P.01

GETTING STARTED

WARNING: Do not attempt to change the batteries yourself. Opening the watch case will void your warranty. Using an incorrect battery may cause the watch to overheat or catch fire.

GETTING STARTED

CHARGE THE WATCH.

Charge the watch for at least two hours before use.

NOTE: The first time you charge the watch, the display might be blank. After you set up the watch, the charging icon ⚡ is displayed while the watch charges.

Before you charge your watch, disconnect the charger from power and thoroughly wipe the charger and watch contact pins with a soft, lint-free cloth. If needed, you may dampen the cloth with a small amount of isopropyl rubbing alcohol. Never use soap or any chemicals other than isopropyl rubbing alcohol to clean the contact pins for the watch or charger.

GETTING STARTED

ACTIVATE THE WATCH

To turn on the watch, press and hold the top watch button ① until the Setup screen is displayed on the watch.

Setup
Start Phone app & follow instructions

GETTING STARTED

INSTALL THE PHONE APP.

The VeliGear Smartwatch phone app connects your watch to your phone. Use the phone app to set and control your watch.

NOTE: Your phone must have operation system either iOS 9 or later or Android 6.0 or later.

- A. On your phone, go to www.XXXXXXXXXXX.com and select your watch.
- B. Select App Store (IOS) or Play Store (Android) to download and install VeliGear Smart Watch app on your phone.

GETTING STARTED

CONNECT YOUR WATCH TO YOUR PHONE.

A. Make sure that your phone's Bluetooth® is turned on.

NOTE: If you connect the watch to the phone using only your phone's Bluetooth settings, you cannot use the functions of your watch. You must connect the watch using the phone app to enable the phone to push notifications and other information to the watch.

If to re-pair your watch, you can go to Device setting to forget the watch from phone's Bluetooth before to do re-pairing.

B. Open the VeliGear Smartwatch phone app on your phone, then follow the on-screen instructions to set up your account.

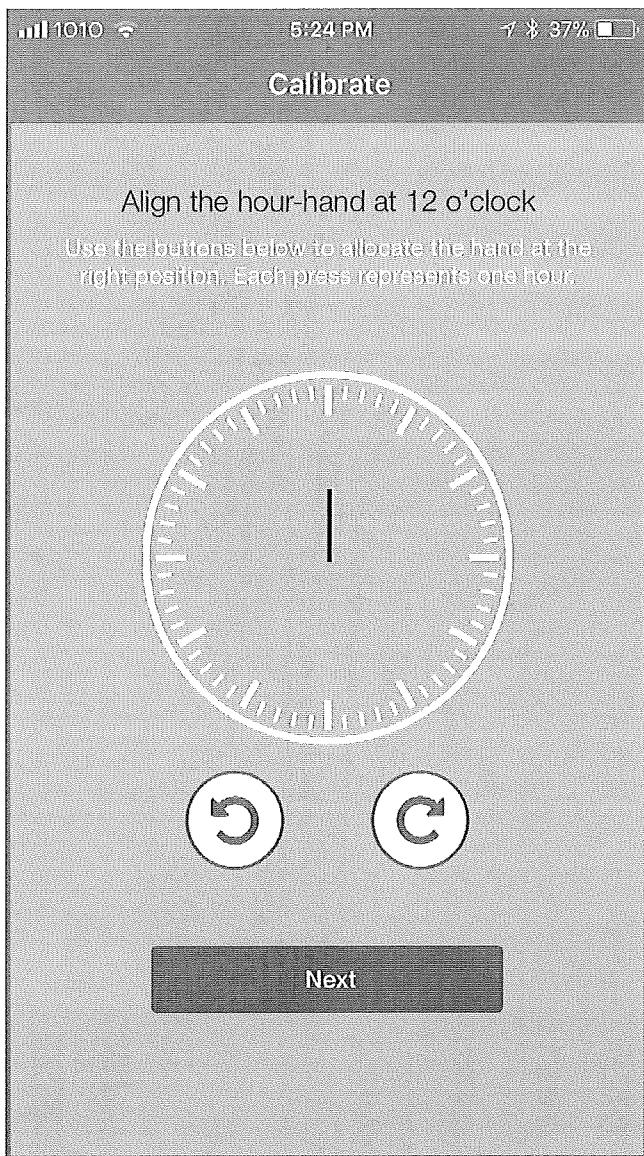

C. The phone app automatically searches for nearby watch, press the top watch button ① so that the setup screen is displayed and the app can find your watch.

D. When the phone app finds your watch, enter the PIN displayed on your watch to phone app.

GETTING STARTED

HANDS RECALIBRATE

In the phone app, Select Time > Setting > Recalibrate hands, following the step to calibrate hour hand, minute hand and second hand.

GETTING STARTED

CONFIGURE YOUR WATCH USING THE PHONE APP.

A. In the phone app, enable notification permissions. You must enable permissions to use the features of your watch. Notification permissions allow you to push any notifications from a third-party app, such as Facebook or Twitter, to the watch. See your phone documentation for instructions for enabling notifications.

B. In the phone app, Select **Time, Activities, Compass, Hot key or Notifications** also controls vibration notification settings. See “Customizing Notifications” on page 19 for more information.

You have now completed your watch setup. The rest of this guide provides more information about using your watch and customizing it using the phone app.

REGULATORY NOTICES

FCC ID: O4GDAVGEAR

Model: XXXXXXXX

FCC STATEMENT

This device complies with Part 15 of the FCC Rules.

Operation is subject to the following two conditions: (1) This device may not cause harmful interference, and (2) This device must accept any interference received, including interference that may cause undesired operation.

The grantee is not responsible for any changes or modifications not expressly approved by the party responsible for compliance. Such modifications could void the user's authority to operate the equipment.

The RF Exposure Compliance distance is 5 millimeters.

NOTE: This equipment has been tested and found to comply with the limits for a Class B digital device, pursuant to part 15 of the FCC Rules. These limits are designed to provide reasonable protection against harmful interference in a residential installation. This equipment generates, uses and can radiate radio frequency energy and, if not installed and used in accordance with the instructions, may cause harmful interference to radio communications. However, there is no guarantee that interference will not occur in a particular installation. If this equipment does cause harmful interference to radio or television reception, which can be determined by turning the equipment off and on, the user is encouraged to try to correct the interference by one or more of the following measures:

- Reorient or relocate the receiving antenna.
- Increase the separation between the equipment and receiver.
- Connect the equipment into an outlet on a circuit different from that to which the receiver is connected.
- Consult the dealer or an experienced radio/TV technician for help.

Technical Specification:

Frequency operation range: 2402MHz ~ 2480MHz

Maximum transmit power: <10dBm (max.)
