

ATTACHMENT 7 - PARTS LIST/TUNE-UP INFORMATION

PARTS LIST

The HST-900 contains the following modules:

- Chassis Assembly (Mechanical)
- Channel Card
- Data Processor Card
- Power Supply
- External Reference Oscillator
- Output Amplifier module
- Backplane (Passive Interconnect Card)

A description of these modules can be found in Attachment 6 – Product Description.

TUNE UP PROCEDURE

The HST-900 transmitter does not require tune up during construction, maintenance or operation. The only adjustable component in the HST-900 is the High Stability Reference Oscillator, which is adjusted for proper frequency prior to unit assembly. No transmitter controls are available to the operator.
