

EXHIBIT 3 - EUT INTERNAL PHOTOGRAPHS

EUT Housing and Board View 1	 A photograph showing the internal components of an Electronic Under Test (EUT) housing. The components are laid out on a blue textured surface next to a black ruler with white markings. The components include a white plastic housing, a green printed circuit board (PCB) with various electronic components, a small yellow component, a small silver component, and a small black component. The ruler shows measurements in millimeters, with markings from 0 to 100 mm visible.
Solder Board-Component View 1	 A close-up photograph of a green printed circuit board (PCB) component. The component is laid out on a blue textured surface next to a black ruler with white markings. The ruler shows measurements in millimeters, with markings from 0 to 100 mm visible. The component has a green PCB with various electronic components, including a small yellow component and a small silver component. The text "02-JL8972A-V1.1" and "20201110" is visible on the PCB.

Solder Board-Component View 2	 A photograph showing a small green printed circuit board (PCB) component mounted on a blue textured surface. The component is positioned horizontally. A black ruler with white markings is placed vertically to the left of the component, showing measurements in millimeters. The ruler has markings for 10, 20, 30, 40, 50, 60, and 70 mm. The component is approximately 10 mm long and 5 mm wide.
Solder Board-Component View 3	 A photograph showing a small yellow component, likely a battery or capacitor, mounted on a blue textured surface. The component is positioned horizontally. A black ruler with white markings is placed vertically to the left of the component, showing measurements in millimeters. The ruler has markings for 10, 20, 30, 40, 50, 60, 70, and 80 mm. The component is approximately 10 mm long and 5 mm wide.

Solder Board-Component View 4	 A photograph showing a yellow rectangular component, likely a battery, soldered onto a blue textured surface. The component is positioned near a black ruler with white markings. The ruler has two scales: a vertical scale on the left ranging from 0 to 70 mm and a horizontal scale at the bottom ranging from 0 to 100 mm. The component is approximately 10 mm wide and 15 mm high. Two thin wires, one red and one green, are attached to the component.
Antenna View	BT Antenna  A photograph showing a green printed circuit board (PCB) with a blue antenna element. The PCB is positioned near a black ruler with white markings. The ruler has two scales: a vertical scale on the left ranging from 0 to 70 mm and a horizontal scale at the bottom ranging from 0 to 100 mm. The PCB is approximately 10 mm wide and 15 mm high. A red line points from the text "BT Antenna" to the antenna element on the PCB.
