RE: FCC ID: APYNAR0061_ATCB003940
Attention: Keijiro Kumagai

I have a few comments on this Application. Please note that further comments may arise in response to answers provided to the questions below.

1. Please note that the SAR report page 4 states that the maximum transmit power tested is 922.6mW. However, while it is within 0.5dB of the EMC report, it is not clear in the SAR report if this is EIRP or conducted power. It is assumed to be conducted power. Please confirm.

The items indicated above must be submitted before processing can continue on the above referenced application. Failure to provide the requested information may result in application termination. Correspondence should be considered part of the permanent submission and may be viewed from the Internet after a Grant of Equipment Authorization is issued.

Please do not respond to this correspondence using the email reply button. In order for your response to be processed expeditiously, you must submit your documents through the AmericanTCB.com website. Also, please note that partial responses increase processing time and should not be submitted.

Any questions about the content of this correspondence should be directed to the sender.
