

USER MANUAL

Product Parameters

Model	V80015 Headphones	Use Distance	10M
Version	V5.3	Battery Capacity	200mAH
Stand-by Time	180 hours	Playing time	about 6 hours
Power Input	DC5V/200mA	Charging Time	about 2 hours

Pairing and Connection

1. Keep the distance between the mobile phone and the headset within 1 m; the closer, the better.
2. Press and hold the key "⏻" for about 5 seconds, and then release it when the red and the blue lamps alternately blink. At this time, the headset has entered the pairing mode.
3. Enable the Bluetooth function of the mobile phone, search the Bluetooth equipment, select "V80015 Headphones" for pairing and connection. After connection is successful, the blue indicating lamp of the headset slowly blinks.

Notes:

- If there is no BT connection within 5 minutes, the headphone will be powered off automatically
- After pairing is completed, the headset and the handset will remember each other, without pairing

Label

This device complies with part 15 of the FCC Rules. Operation is subject to the following two conditions:

- (1) This device may not cause harmful interference, and
- (2) this device must accept any interference received, including interference that may cause undesired operation.

FCC warning

Any Changes or modifications not expressly approved by the party responsible for compliance could void the user's authority to operate the equipment.

Note: This equipment has been tested and found to comply with the limits for a Class B digital device, pursuant to part 15 of the FCC Rules. These limits are designed to provide reasonable protection against harmful interference in a residential installation. This equipment generates uses and can radiate radio frequency energy and, if not installed and used in accordance with the instructions, may cause harmful interference to radio communications. However, there is no guarantee that interference will not occur in a particular installation. If this equipment does cause harmful interference to radio or television reception, which can be determined by turning the equipment off and on, the user is encouraged to try to correct the interference by one or more of the following measures:

- Reorient or relocate the receiving antenna.
- Increase the separation between the equipment and receiver.
- Connect the equipment into an outlet on a circuit different from that to which the receiver is connected.
- Consult the dealer or an experienced radio/TV technician for help.

The device has been evaluated to meet general RF exposure requirement. The device can be used in portable exposure condition without restriction.
