

Label Location

1. The phone supports only Nano-SIM and microSD cards. No-card or incorrectly put SIM cards can damage the phone.
2. Do not scratch the phone screen and the phone body.
3. Do not remove the back cover and battery. To have it replaced, contact a professional service center.
Note: Follow all instructions carefully. Improper use will invalidate the warranty.

Procedure
Step 1: Power off your phone before installing and removing the card tray.
Step 2: Use the ejection pin to remove the card tray.
Step 3: Put the Nano-SIM or microSD card into the card tray.
Step 4: Push the card tray into the phone.
