Quick Starter Guide

1. BEFORE POWERING ON, CHARGE FOR 24 HOURS

The diagram shows a mobile phone on the left, connected by a horizontal line with a lightning bolt in the middle to a power source on the right. The power source is represented by a battery symbol with a small plug-like icon on its right side.

2. INSERT SIM CARD

Insert the Sim card

The diagram shows the back of a mobile phone with the SIM card slot open. A SIM card is shown being inserted into the slot. An arrow points to the right, indicating the direction of insertion.

4. AUDIO PLAYER

1. Insert the micro SD card

3. FM RADIO

(((•))) Built in Antenna

4. AUDIO PLAYER

1. Insert the micro SD card

3. FM RADIO

(((•))) Built in Antenna

4. AUDIO PLAYER

1. Insert the micro SD card

2. Connect the phone with the computer via USB.

The diagram illustrates the connection of the P70 phone to a computer. At the top left, a vertical rectangular device (likely a USB hub or adapter) is shown with a cable extending from its side. This cable ends in a USB connector. In the center, two thick black arrows point vertically downwards, indicating the connection process. To the right of the arrows is a desktop computer setup consisting of a monitor, a system unit, and a keyboard. Below this entire assembly is a detailed line drawing of the P70 phone, which has a large screen, a small speaker, and a full QWERTY keyboard.

3. Upload and transfer music files

4. Enjoy the audio player

5. 3D stereo sound

3. Upload and transfer music files

4. Enjoy the audio player

5. 3D stereo sound

FCC Warning

Specific Absorption Rate (SAR) information SAR tests are conducted using standard operating positions accepted by the FCC with the phone transmitting at its highest certified power level in all tested frequency bands, although the SAR is determined at the highest certified power level, the actual SAR level of the phone while operating can be well below the maximum value, in general, the closer you are to a wireless base station antenna, the lower the power output.

Before a new model phone is available for sale to the public, it must be tested and certified to the FCC that it does not exceed the exposure limit established by the FCC, Tests for each phone are performed in positions and locations (e.g. at the ear and worn on the body) as required by the FCC. For body worn operation, this mobile phone has been tested and meets the FCC RF exposure guidelines when used with an accessory designated for this product or when used with an accessory that contains no metal and that positions the handset a minimum of 5mm from the body.

This device complies with part 15 of the FCC Rules. Operation is subject to the following two conditions:

- (1) This device must not cause harmful interference, and
- (2) this device must accept any interference received, including interference that may cause undesired operation.

Any Changes or modifications not expressly approved by the party responsible for compliance could void the user's authority to operate the equipment.

Note: This equipment has been tested and found to comply with the limits for a Class B digital device, pursuant to part 15 of the FCC Rules. These limits are designed to provide reasonable protection against harmful interference in a residential installation. This equipment generates and can radiate radio frequency energy and, if not installed and used in accordance with the instructions, may cause harmful interference to radio communications. However, there is no guarantee that interference will not occur in a particular installation. If this equipment does cause harmful interference to radio or television reception, which can be determined by turning the equipment off and on, the user is encouraged to try to correct the interference by one or more of the following measures:

measures:

- Reorient or relocate the receiving antenna.
- Increase the separation between the equipment and receiver.
- Connect the equipment into an outlet on a circuit different from that to which the receiver is connected.
- Consult the dealer or an experienced radio/TV technician for help
