A line drawing of a headset with a microphone boom. To the right of the headset, there are five callout icons connected by dashed lines to specific parts of the device: a speaker icon for the earcup, a microphone icon for the boom, a volume icon (two arrows pointing outwards) for the volume controls on the boom, a plus sign icon for the call button, and a double arrow icon for the mute button.

after 10 minutes.Voice Dial Continuously double press it to enter voice dial

A diagram of a car's center console with six buttons. Each button is connected by a dotted line to a legend on the right. The legend consists of a circular icon followed by a text label. The buttons and their corresponding labels are: a play button for 'short', a stop button for 'short', a telephone handset for 'short', a telephone handset for 'short', a crossed wrench and screwdriver for '2s', and a lightning bolt for 'short'.

Control de Volumen / Control de la Música

NOTE: This equipment has been tested and found to comply with the limits for a Class B digital device, pursuant to part 15 of the FCC Rules. These limits are designed to provide reasonable protection against harmful interference in a residential installation. This equipment generates uses and can radiate radio frequency energy and, if not installed and used in accordance with the instructions, may cause harmful interference to radio communications. However, there is no guarantee that interference will not occur in a particular installation. If this equipment does cause harmful interference to radio or television reception, which can be determined by turning the equipment off and on, the user is encouraged to try to correct the interference by one or more of the following measures:

- Reorient or relocate the receiving antenna.
- Increase the separation between the equipment and receiver.
- Connect the equipment into an outlet on a circuit different from that to which the receiver is connected.
- Consult the dealer or an experienced radio/TV technician for help

Changes or modifications not expressly approved by the party responsible for compliance could void the user's authority to operate the equipment.

This device complies with Part 15 of the FCC Rules. Operation is subject to the following two conditions:

- (1) this device may not cause harmful interference, and
- (2) this device must accept any interference received, including interference that may cause undesired operation.
