

Date: December 12, 2022

FCC ID: 2AAAS-CM07

To Whom it may concern,

We, Vivint, Inc., declare as below:

The product identification label listing the manufacturer, model number, serial number, input rating, country of origin, and the FCC Identifiers is permanently affixed to the bottom surface of the indoor camera. The identification label is readily visible to the end user when the product is removed from the packaging. After installation, the identification label is readily visible when the indoor camera is removed from the mounting plate. The FCC Identifiers and regulatory warning statements are also contained in the User Guide/Instructions.

The mounting plate must be attached to the back side of the indoor camera when vertical wall mounting option is used.

Vivint has attached the identification label to the bottom surface of the indoor camera, as the indoor camera is the device that is FCC certified and not the mounting plate. FCC Part 2.925 (d) (2) states, "It is preferable that it (label) be visible at all times during normal installation or use, but this is not a prerequisite for grant of equipment authorization."

Sincerely,

Applicant : Vivint, Inc.
Address : 4931 N. 300 W. Provo, Utah 84604, United States
