Re: Certification for Schlage Lock Company / Allegion BE468 and BE469  
IC: 8053B-NGCHEE

Please find enclosed application materials for certification of Schlage Lock Company / Allegion BE468 and BE469. We tested it and found it to comply with RSS-210/GEN.

**Current Variants:**

There are two variants of the EUT. Both are electrically identical except for a change of digital component population. Sample BE468 populates an LED light while sample BE469 populates a piezo speaker. Each variant may employ one of two different escutcheon faceplates (Camelot - rounded and Century - squared). Highest radio emissions were observed from the BE468 variant employing the two escutcheon faceplates.

If there are any questions regarding the application or testing performed, please contact us at the above address or call (734) 252-9785, or e-mail info@wrtest.com.

Sincerely,  
  
Joseph D. Brunett
