The Serene Wall Reader consists of the following main components:

- Serene Wall Reader
- Smart Relay Board (SRB)
- Expansion Relay Board (ERB) – optional

The Serene Wall Reader component is the portion of the system that contains the RFID and BTLE radios. Customers use the reader by presenting cards and/or connecting to the reader with a mobile device.

The Smart Relay Board is the portion of the system that contains the output relay, powering the access control device (the latch).

The Expansion Relay Board is an optional component that allows the control of additional relay outputs.
