TRP Factor=1dB										

Note:

- 1) According to the EIRP test results, validate the TRP test on the EIRP Worst Margin result.
- 2) The laboratory tested the EIRP of the maximum gain value angle and calculated the EIRP value for each angle based on the antenna gain value provided by the manufacturer.
- 3) The laboratory test showed a baseline noise of -30dBm, and the calculated result value was compared to the baseline noise, using a larger result value.
