

EXHIBIT 4 - TEST SETUP PHOTOGRAPHS

Conducted Emission Test Setup	 A photograph showing a conducted emission test setup. On the left, a piece of electronic equipment, likely a spectrum analyzer or a noise meter, sits on a light-colored wooden table. A red cable is connected to it. To the right, another wooden table holds a small electronic device, possibly a power supply or a test unit, with a power cord plugged into a wall outlet. The background is a plain, light-colored wall.
Radiation Emission View (Below 30MHz)	 A photograph showing a radiation emission test setup. A large, rectangular metal frame is positioned in the center of the room. Inside the frame, a small electronic device is placed on a table. The walls of the room are covered with white, square-shaped absorbers, likely for electromagnetic interference (EMI) shielding. The floor is dark and reflective.
