

EXHIBIT 3 - EUT INTERNAL PHOTOGRAPHS

**EUT Housing and Board
View 1**

**EUT Housing and Board
View 2**

Solder Board-Component View 1	 A photograph of a green printed circuit board (PCB) with various electronic components. The board is oriented horizontally. On the left side, there are two large, cylindrical components, possibly connectors or relays. In the center, there are several smaller components, including what appear to be capacitors and integrated circuits. On the right side, there is a USB port and a small black component. The board is placed on a blue background with a black ruler for scale. The ruler has markings in millimeters (mm) and centimeters (cm).
Solder Board-Component View 2	 A photograph of the same green printed circuit board (PCB) from a different angle. This view shows the underside of the board. Various components are visible, including a large orange component on the right side, several capacitors, and integrated circuits. The board is placed on a blue background with a black ruler for scale. The ruler has markings in millimeters (mm) and centimeters (cm).

Solder Board-Component View 3	 A photograph of a small green printed circuit board (PCB) component, labeled '3', placed on a blue textured surface. The component is rectangular and features several electronic components, including two large electrolytic capacitors, a smaller capacitor, and various resistors. It has two white plastic connectors on one side. A black L-shaped ruler with white markings in millimeters is positioned next to the component for scale. The ruler shows the component is approximately 20 mm wide and 15 mm high.
Solder Board-Component View 4	 A photograph of a small green printed circuit board (PCB) component, labeled '4', placed on a blue textured surface. The component is rectangular and features several electronic components, including two large electrolytic capacitors, a smaller capacitor, and various resistors. It has two white plastic connectors on one side. A black L-shaped ruler with white markings in millimeters is positioned next to the component for scale. The ruler shows the component is approximately 20 mm wide and 15 mm high.

Solder Board-Component View 5	 A photograph of a small, rectangular, yellowish-brown electronic component board. The board features a small LCD display showing '0000', several push buttons, and various electronic components like resistors and capacitors. It is placed on a blue background with a black ruler for scale. The ruler has markings in millimeters and centimeters.
Solder Board-Component View 6	 A photograph of a small, rectangular, green electronic component board. The board has numerous gold-colored pins or solder points along its edges and some surface components. It is placed on a blue background with a black ruler for scale. The ruler has markings in millimeters and centimeters.

Solder Board-Component View 7	 A photograph showing a blue rectangular battery component with the text "Beauty Li-ion 18650 1800mAh 7.4V 2021.03" printed on it. The battery is placed on a blue textured surface next to a black ruler with white markings. Two thin wires, one red and one black, are connected to the top of the battery.
Antenna View	Bluetooth Antenna  A photograph of a green printed circuit board (PCB) populated with various electronic components, including four silver SMA connectors, capacitors, and integrated circuits. A red line points from a label "Bluetooth Antenna" to a small black rectangular component on the right side of the board, which is also enclosed in a red rectangular box.
