RE: Request for Class II Permissive Change – FCC: SWX-WAVELR

It is hereby requested that Ubiquiti Inc. obtain FCC Class II Permissive Change certification of a radio apparatus on the Ubiquiti Inc. product Wave-LR. The associated FCC: number is listed above.

The Class II Permissive Change certification is to add a new antenna used in the transmission of the Bluetooth transmitter.

The Wave-LR is a 60 GHz point-to-multipoint customer premise equipment that features wave technology with a 1.5+ Gbps throughput rate. The Wave-LR is also equipped with a 5 GHz WiFi 6 backup radio to sustain connectivity during a 60 GHz link disruption caused by inclement weather conditions. A Bluetooth LE transceiver is included for device management. The Wave-LR is an outdoor device and has an Ethernet port which is used for data transfer and to provide power using an Ubiquiti U-POE-at 48-volt PoE power adapter.

Sincerely,

Alex Macon
Ubiquiti Inc.
Compliance Officer
