## BLAVOR PN-W12 美国说明书

## BLAVOR Welcome Guide

**PN-W09** Qi Solar Power Bank

#### mportant safety instructions

#### Warning: When using this product, basic precautions should always be followed, including the following:

- A. Carefully read the User Manual before using the power bank.
- B. Close supervision is needed when the power bank is used near children.
- C. Do not strike, hit or insert any foreign objects into the power bank or any of its ports.
- D. Do not expose the power bank to heavy rain/snow to avoid malfunction.
- E. Do not immerge the power bank into water to avoid malfunction.
- F. Do not disassemble or reassemble the power bank without authorization from manufacturer
- G. Do not use the power bank if it has been damaged or modified. If you see any bulging, swelling, leakage or other abnormality from the power bank, stop using it immediately.

#### Special Attention

- 1. The suggested working/storage temperature is between -4°F and +140°F(-20°C~+60°C).
- 2. Do not expose a power bank to fire or extreme high temperature.Exposure to fire or temperature above 176°F/80°C may cause battery swelling up or explosion
- 3. Do not leave the power bank on the car dashboard without supervison. Under hot weather, the temperature inside a parked car can reach above 176°F/80°C, where the battery may swell up or explode...

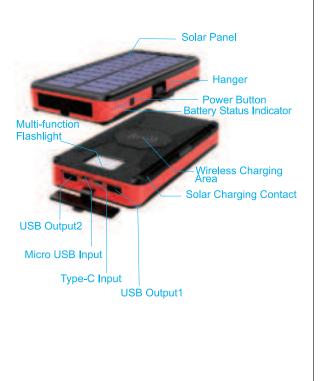

- 4. Do not leave the power bank on the flat surface of concrete, metal and wooden floor to have the battery being solar charged. Under strong sunlight, the surface temperature of concrete.metal and wooden floor may reach above 176°F/80°C, where the battery may swell up or explode.
- 5. For solar panel charging, we recommend that you hang the power bank in a ventilated environment for solar charging to avoid swell up of the battery due to extrem high temperature.

## Legal and Regulatory Compliance

All BLAVOR power banks have undergone extensive tests and the strict quality control procedure.Both our factory and products are tested and certified.

- 1. ISO 9001:Quality management system that demonstrateits our ability to consistently provide products and services that meet customer and applicable statutory and regulatory requirements.
- 2. UN38.3 Test Certificate: This ensures that the battery cell used in the power bank adheres to safety standards for things like maximum continuous charge voltage, cut off voltage, cell numbers, nominal voltage, discharge etc.
- 3. MSDS Certificate: This is the Material Safty Data Sheet, all our power banks come with MSDS sheets, these sheets outline the hazardousness material with batteries. handling procedures, precautions etc.
- 4. UL 2056 Test Certifiacte: A safety standards proves that the products has been gone through a series of in-depth evaluations by UL expert engineers.
- 5. CE Certifictae: All our power banks are certified with CE certificates to ensure they comply with regulations for sale in Europe Market.

#### Product Details

Thank you for choosing the BLAVOR solar power bank. Please read the manual carefully prior to your first use so as to enjoy it as soon as possible.

### Product Parameter

20000mAh Detachable Wireless Solar Power Bank (5-in-1 solar panel)

| Micro USB Input    | 5V/2.1A                 |
|--------------------|-------------------------|
| Type-C Input       | 5V/2.1A                 |
| USB Output1        | 5V1.0A                  |
| USB Output2        | 5V/2.1A                 |
| Wireless Output    | 5 V/1.0 A               |
| Solar Panel Output | 260mAh for each panel   |
| Battery Capacity   | 20000mAh                |
| Type of Battery    | Lithium polymer battery |
| Expanded Size      | 205*24mm                |
| Folded Size        | 157*88*43mm             |
| Weight             | 21.70oz                 |
|                    |                         |

#### PACKAGE CONTENTS:

1\* Wireless Solar Power Bank 1\*USB Charging Cable 1\* Compass 1\*User Manual

#### 1. Battery Status Indicator

- (1) The battery status indicator four top-left LED lights from the bottom to the top (separately represent 25%, 55%, 75%) and 100% battery status); have a short press on the power button to activate the battery status indicator.
- (2) The battery status indicator will automatically be off when no action is taken within 8 seconds.

#### 2. Solar Panel Indicator

- (1) The green LED light beside the 25% blue battery status indicator-the solar panel indicator
- (2) How to charge the power bank by solar? Extend and expose the five solar batteries to the sun then the power bank will be automatically solar batteries to the sun then. the power bank will be automatically charged; when the green indicator is on, it enters the solar charging mode successfully.
- (3) Two metal contacts in magnetic attraction (on the side of power bank)help the solar panel to realize solar battery charging under the exposure of sun.
- (4) Detachable solar panels (5-in-1): after the four linked solar panels are removed, the last main solar panel, as a single piece of solar, is able to support the normal work of the power bank; in addition, the magnetic seal strip can perfectly fit the right side of the solar panel.

#### 3. Wireless Charging Area

- (1) How to charge the device by the wireless charging function? please have a short press on the power button and put the device within the wireless output area.
- (2) Note: The wireless charging function is only suitable for Qi certified device, please check whether the wireless charging function is supported by your device.

#### 4. LED Flashlight Function

- turn on the LED flashlight:
- third time.
- off the flashlight.

conversion rate.

### 6. Warranty and After-sales Service

- the return shipping costs.
- know by contact us at.

CONTACTUS Support@blavor.com

(1) Please press the power button for about 3 seconds to

(2) Please short press the power button again to change the "Flashligh Mode" to "SOS Mode".

(3) If you would like to speed up the flicker frequency of "SOS Mode", please short press the power button a

(4) Please short press power button a fourth time to turn

#### 5. Environmental Requirement for Solar Panel Charging

(1) Ideal sunlight intensity: 25000Lux. The charging speed is subject to sunlight intensity, solar panel size, and panel

(1) Every BLAVOR product comes with at least 12-month warranty and lifetime technical support

(2) You could return your undamaged product and its packaging within 30 days of purchase to receive a FULL REFUND for any reason. If the reason for return isn't quality-related, the customer must pay

(3) In case of guality problems, you can exchange products within 12 monthes after your purchase.

(4) If you're not 100% satisfied with the product you received, we would be very grateful if you could let us

#### FCC Statement

This equipment has been tested and found to comply with the limits for a Class B digital device, pursuant to Part 15 of the FCC Rules. These limits are designed to provide reasonable protection against harmful interference in a residential installation. This equipment generates uses and can radiate radio frequency energy and, if not installed and used in accordance with the instructions, may cause harmful interference to radio communications. However, there is no guarantee that interference will not occur in a particular installation. If this equipment does cause harmful interference to radio or television reception, which can be determined by turning the equipment off and on, the user is encouraged to try to correct the interference by one or more of the following measures:

-- Reorient or relocate the receiving antenna.

-- Increase the separation between the equipment and receiver.

-- Connect the equipment into an outlet on a circuit different from that to which the receiver is connected. -- Consult the dealer or an experienced radio/TV technician for help.

This device complies with part 15 of the FCC Rules. Operation is subject to the following two conditions:(1) This device may not cause harmful interference, and (2) this device must accept any interference received, including interference that may cause undesired operation.

Changes or modifications not expressly approved by the party responsible for compliance could void the user's authority to operate the equipment.
