Open-Ear Air Conduction Headphones For Sports

Air Turbo 3

User Manual

Important Safety Instructions

Please read and keep all safety and use instructions.

Warnings/cautions

- Do NOT use the head phones at a high/loud volume for an extended period.
- To avoid hearing damage, use your headphones at a comfortable, moderate volume level.
- Turn the volume down on your device before placing the headphones in/on your ears, then turn the volume up gradually until you reach a comfortable listening level.
- Do NOT use your head phones while driving or phone calls or another purpose.
- Do NOT use the head phones at anytime the inability to hear surrounding sounds may present a danger to yourself or others, eg., while riding a bicycle or walking in an area where a construction site is located, etc.
- Remove the headphones, to ensure you can hear surrounding sounds, including alarms and warning signals.
- Be aware of how sounds that they rely on as reminders or warnings may vary in character when using the headphones.
- Do NOT use the head phones if you experience unusual noise/s such as pings, turn the headphones off and contact SUDOTACK customer service.
- Remove headphones immediately if you experience a warming sensation or loss of audio.
- Do NOT use mobile phone adapters to connect headphones to airplane jacks, as this could result in injury due to property damage due to overheating.

Important Safety Instructions

Please read and keep all safety and use instructions.

Warnings/cautions

- Do NOT use the headphones as aviation communication headssets except in case of emergency.
- No incoming audio will be heard with a discharged or improperly installed battery. This could result in the potential of missed communications while piloting an aircraft.
- Extremely loud ambient noise levels common to many propeller-driven aircraft may impair your ability to receive incoming audio communications, particularly during takeoff and climb out.
- The headphones are not engineered for noise conditions, altitude, operation or other environmental conditions common in non-commercial aircraft, resulting in possible interference to critical communications.

Contains small parts which may be a choking hazard. Not suitable for children under age 3.

This product contains magnetic material. Consult your physician on whether this might affect your implantable medical device.

- To reduce the risk of fire or electrical shock, do NOT expose this product to rain, liquids, or moisture.
- Do NOT make unauthorized alterations to this product.
- Use this product only with an agency approved power supply which meets local regulatory requirements (e.g., UL, CSA, VDE, CCC).
- Do not expose products containing batteries to excessive heat (eg. from storage in direct sunlight, fire or the like).

Regulatory Information

NOTE: This equipment has been tested and found to comply with the limits specified in FCC Part 15 of the FCC Rules.

Regulatory Information

Information on electrical/electronic equipment

The following notice is aimed at private end users who use electrical and/or electronic devices:

- Separate collection of old devices
Electrical and electronic equipment that has become waste is referred to as waste equipment. Owners of old devices must collect them separately from unsorted municipal waste. In particular, old devices do not belong in household waste, but in a special collection and return system.
- Batteries and rechargeable batteries
As a rule, owners of old devices must separate old batteries and accumulators that are not embodied in the old device from it before handing them over to a collection point. This does not apply if the old devices are handed over to public waste disposal authorities and are separated there from other devices in order to prepare them for reuse.
- Options for returning old devices
If you use old devices, you can hand them over to the options set up and available by public waste disposal authorities for the purpose of proper disposal of old devices. It may also be possible to hand in electrical and electronic equipment there for the purpose of reusing the equipment. You can obtain more detailed information on this from the respective collection or collection point.
- Privacy Notice
Old devices often contain sensitive personal data. This applies in particular to information and telecommunications technology devices such as computers and smartphones. In your own interest, please note that each end user is responsible for deleting the data on the old devices to be disposed of.

Model : AT3

To get technical support, please scan the QR code

The crossed-out wheeled bin symbol on batteries or accumulators means that they must not be disposed of with household waste at the end of their useful life. If batteries or accumulators contain mercury (Hg), cadmium (Cd) or lead (Pb), you will find the respective chemical symbol below the symbol of the crossed-out garbage can. You are legally obliged to return old batteries and accumulators after use to a collection point near you. Addresses of suitable collection points can be obtained from your city or local government.

Batteries may contain substances that are harmful to the environment and human health. Particular caution is required due to the special risks involved in handling lithium-containing batteries. The separate collection and recycling of old batteries and accumulators is intended to avoid negative effects on the environment and human health.

Please avoid generating waste from old batteries as much as possible, e.g. by giving preference to batteries with a longer lifespan or rechargeable batteries. Please avoid littering public spaces by not leaving batteries or battery-containing electrical and electronic devices lying around. Please explore ways to recycle a battery instead of disposing of it, such as reconditioning or repairing the battery.
