

成型尺寸: 71x71mm 128g双铜纸, 单黑, 表面过光油, 折页

Product Overview

The ATUVOS TAG (AT2101) is a Find My Network accessory that lets you find everything that matters to you. The Apple Find My Network provides an easy, secure way to locate compatible personal items on a map using the Find My app on your iPhone, iPad, iPod touch, or Mac. Simply pair your ATUVOS TAG with the Apple Find My app to view it right alongside your Apple devices. If your item ever goes missing, you can put it in Lost Mode to display a message and contact information to anyone who might find it.

The Find My network is encrypted and anonymous, so no one else, not even Apple or the maker of your personal item, can view its location. The ATUVOS TAG uses Bluetooth low energy technology (BLE) and a replaceable battery (CR2032), which gives you up to 6 months of battery life. Setup is quick and easy. Make your life easier today.

* To use the Apple Find My app to locate this item, the latest version of iOS, iPadOS, or macOS is recommended.

Factory Reset

g press and hold the button for about 10 seconds until the buzzer
os long time. The device is now in pairing mode.All connection
will be cleared. You must remove the accessory from the app and
add it back.

part 15 of the FCC rules. Operation is subject to the following conditions: 1) this device may not cause harmful interference, 2) this device must accept any interference received, which may cause undesired operation.

has been tested and found to comply with the FCC Rules, pursuant to part 15 of the FCC Rules. It is designed to provide reasonable protection against interference to a residential installation. This equipment may not radiate radio frequency energy and, if not used in accordance with the instructions, may cause interference to radio communications. However, there is no guarantee that no interference will occur in particular installation. If interference is caused to radio or television reception, it can be determined by turning the equipment off and on. If it is determined that the equipment is the cause of the interference, the user should be advised to take the following measures:

- 1. Relocate the receiving antenna.
- 2. Increase the distance between the equipment and receiver.
- 3. Connect the equipment into an outlet on a circuit different from that to which the receiver is connected.
- 4. Consult the dealer or an experienced radio/TV technician for help.

The user should not expressly approved by the party responsible for the installation. This warranty could void the user's authority to operate the equipment.
