To Whom It May Concern:

RE: Request for expedited review for FCC ID YETP24512NU and YETP24512CU

We hereby respectfully request that Expedited Review of the DFS capabilities of the Cel-Fi P34-2/4/5/12 Provider Specific Consumer Signal Booster.

This DFS operation of this signal booster has already been reviewed for DFS conformance under FCC ID's YETD24NU and YETD24CU. The Cel-Fi P34-2/4/5/12 uses the identical RF and processing chains for DFS operation as the already approved Cel-Fi D32-2/4 product that was reviewed and tested by OET.

Sincerely,

Michiel Lotter
