

WLAN Antenna

Dimensions

SPECIFICATIONS

Parameter	Test conditions	Rating
Frequency range		2400-2500MHz
VSWR	An antenna is attached on the specified position of a handheld terminal, and is measured.	3.0:1 Maximum (2450MHz)
Impedance		50 Ohms
Gain		2.14dBi Maximum
Antenna type		Modified dipole antenna
Polarization		Lnear
Cable loss		0.3dB (2450MHz)
