iPad, iPad Air, iPad Pro, iPhone is a trademark of Apple Inc., registered in the U.S. and other countries and regions.
Use of the Made for Apple badge means that an accessory has been designed to connect specifically to the Apple product(s) identified in the badge, and has been certified by the developer to meet Apple performance standards.
Apple is not responsible for the operation of this device or its compliance with safety and regulatory standards.
Please note that the use of this accessory with an Apple product may affect wireless performance.
WARNING: If you are younger than 18, do not use this
You should go to a doctor, preferably an ear-nose-throat doctor (an ENT), because your condition needs specialised care.
Over-the-counter (OTC) hearing aids are only for users who are age 18 or older.
This hearing aid is for adults with signs of mild to moderate hearing loss. How do you know if you have this?
• You have trouble hearing speech in noisy places
• You find it hard to follow speech in groups
• You have trouble hearing on the phone
• Listening makes your head hurt
• You need to turn up the volume on the TV or radio, and other people complain it's too loud
Some people with hearing loss may need help from a hearing healthcare professional.
How do you know if you need to see one?
You can't hearing speech even if the room is quiet
You don't hear loud sounds well, for example you don't hear loud music, power tools, engines, or other very noisy things
If you have hearing loss in both ears, it can be dangerous to your health to use hearing aids without help from a professional.
If this hearing aid does not help you enough, ask for help from a hearing healthcare professional.
WARNING:When to See a Doctor
If you have any of the problems listed below, please see a doctor, preferably an ear-nose-throat doctor (an ENT).
• Your ear has a birth defect or an unusual shape Your ear was injured or deformed in an accident
• You see blood, pus, or fluid coming out of your ear in the past 6 months
• Your ear feels painful or uncomfortable
• You have a lot of ear wax, or you think something could be in your ear
• You get really dizzy or have a feeling of spinning or swaying (called vertigo)
• You suddenly can't hear well, or you can't hear at all
• Your hearing changes: it gets worse then gets better again
• You have worse hearing in one ear
• You hear ringing or buzzing in only one ear.
