

EXHIBIT 3 - EUT INTERNAL PHOTOGRAPHS**EUT Housing and Board
View 1****EUT Housing and Board
View 2**

Solder Board-Component View 1	 A photograph of a green printed circuit board (PCB) component, labeled 'A.', positioned on a black surface with a white ruler. The ruler shows measurements in millimeters (0 to 100 mm) and centimeters (0 to 10 cm). The PCB has several gold-colored solder pads and a central component. Text on the PCB includes 'DC-PW-E2' and 'JETImodel'.
Solder Board-Component View 2	 A photograph of a green printed circuit board (PCB) component, labeled 'B.', positioned on a black surface with a white ruler. The ruler shows measurements in millimeters (0 to 100 mm) and centimeters (0 to 10 cm). The PCB has a central component with a circular opening and several gold-colored solder pads. Text on the PCB includes 'B.'.

Solder Board-Component View 3	 A photograph of a green printed circuit board (PCB) with various electronic components. A large black integrated circuit (IC) with 'ARM' and '47' markings is prominent. Other components include a white multi-pin connector, several red and black capacitors, and various resistors. The board is placed on a blue surface next to a black ruler with white markings in millimeters. The ruler shows measurements from 10 to 100 mm.
Solder Board-Component View 4	 A photograph of the same green PCB as in View 3, showing a different angle or component arrangement. The large black IC is still visible. The board is placed on a blue surface next to a black ruler with white markings in millimeters. The ruler shows measurements from 10 to 100 mm.

Solder Board-Component View 5	 A photograph of a green printed circuit board (PCB) with a black rectangular component mounted on it. The PCB has several yellow components and solder joints. A black ruler with white markings is placed horizontally below the board, showing measurements in millimeters. The board is positioned on a blue surface.
Solder Board-Component View 6	 A photograph of the same green PCB from a different angle, showing the underside. It features a large black integrated circuit (IC) with 'ISS' and '11081880W' printed on it, along with various other components and solder joints. A black ruler with white markings is placed horizontally below the board, showing measurements in millimeters. The board is positioned on a blue surface.

Solder Board-Component View 9	 A photograph of a small green printed circuit board (PCB) component, labeled 'SOLDER-1', positioned on a blue textured surface. The component is oriented vertically and features several gold-colored solder points. A black ruler with white markings is placed horizontally below the component, showing measurements in millimeters (mm) from 0 to 60. The component's length is approximately 10 mm.
Solder Board-Component View 10	 A photograph of the same green PCB component, labeled 'SOLDER-1', positioned on a blue textured surface. The component is oriented horizontally and features several gold-colored solder points. A black ruler with white markings is placed horizontally below the component, showing measurements in millimeters (mm) from 0 to 60. The component's width is approximately 10 mm.

Solder Board-Component View 11	 A photograph of a green printed circuit board (PCB) component, labeled 'Switch' and 'YHALLPL-1', positioned next to a metric ruler. The ruler shows measurements in millimeters, with the component spanning approximately 10 to 20 mm. The component features several gold-colored solder pads and a central black component.
Solder Board-Component View 12	 A photograph of a green printed circuit board (PCB) component, labeled 'H', positioned next to a metric ruler. The ruler shows measurements in millimeters, with the component spanning approximately 10 to 20 mm. The component features several gold-colored solder pads and a central black component.

Solder Board-Component View 13	 A photograph showing a small electronic component, likely a microcontroller or sensor, mounted on a green printed circuit board (PCB). The component is positioned next to a black ruler with white markings, indicating its size. The ruler shows measurements in millimeters (mm) and centimeters (cm). The component is small and rectangular, with a silver-colored metal pad on one side. The background is a light blue surface.
---	---

Solder Board-Component View 15	 A photograph of a small green printed circuit board (PCB) component, labeled 'DS12-JACK-Z' and 'JEI Model', mounted on a blue fabric surface. The component is positioned next to a black ruler with white markings, showing its size in millimeters. The ruler has markings from 0 to 100 mm.
Solder Board-Component View 16	 A photograph of the same green PCB component, labeled 'DS12-JACK-Z' and 'JEI Model', mounted on a blue fabric surface. The component is positioned next to a black ruler with white markings, showing its size in millimeters. The ruler has markings from 0 to 100 mm.
