Ehong Technology Co.,Ltd

Modular Transmitter Approval Request

Federal Communications Commission Equipment Authorization Branch 7435 Oakland Mills Road Columbia, MD 21046

Company name: Ehong Technology Co.,Ltd FCC ID: 2ACCRMC33

Gentlemen,

In accordance with 47CFR 15.212 Modular Transmitters and KDB 996369 D01 'Module Certification Guide v04'. FCC ID: 2ACCRMC33 has been examined against the following requirements.

Items to be covered by Single modular transmitters.

	quirement per 15.212(a)(1) and KDB 996369 D01 odular Certification Guide v04	Explanation from Grantee (do not write yes/no, but explain why product complies/how it is achieved)
1.	The radio elements of the modular transmitter must have their own shielding. The physical crystal and tuning capacitors may be located external to the shielded radio elements.	The module has its own RF shielding.
2.	The modular transmitter must have buffered modulation/data inputs (if such inputs are provided) to ensure that the module will comply with part 15 requirements under conditions of excessive data rates or over-modulation.	The modular has buffered data inputs, it is integrated in chip
3.	The modular transmitter must have its own power supply regulation.	The modular has power supply regulation
4.	The modular transmitter must comply with the antenna and transmission system requirements of §§ 15.203, 15.204(b) and 15.204(c). The antenna must either be permanently attached or employ a "unique" antenna coupler (at all connections between the module and the antenna, including the cable). The "professional installation" provision of § 15.203 is not applicable to modules but can apply to limited modular approvals under paragraph (b) of this section.	Antenna is independent fixed
5.	The modular transmitter must be tested in a stand- alone configuration, i.e., the module must not be inside another device during testing for compliance with part 15 requirements. Unless the transmitter module will be battery powered, it must comply with the AC line conducted requirements found in § 15.207. AC or DC power lines and data input/output lines connected to the module must not contain ferrites, unless they will be marketed with the module (see § 15.27(a)). The length of these lines shall be the length typical of actual use or, if that length is unknown, at least 10 centimeters to insure that there is no coupling between the case of the module and supporting equipment. Any accessories, peripherals, or support equipment connected to the module during testing shall be unmodified and commercially available (see § 15.31(i)).	All power lines derived from the host device are regulated before energizing other circuits internal

6. The modular transmitter must be equipped with either a permanently affixed label or must be capable of electronically displaying its FCC identification number. (A) If using a permanently affixed label, the modular transmitter must be labeled with its own FCC identification number, and, if the FCC identification number is not visible when the module is installed inside another device, then the outside of the device into which the module is installed must also display a label referring to the enclosed module. This exterior label can use wording such as the following: "Contains Transmitter Module FCC ID: XYZMODEL1" or "Contains FCC ID: XYZMODEL1." Any similar wording that expresses the same meaning may be used. The Grantee may either provide such a label, an example of which must be included in the application for equipment authorization, or, must provide adequate instructions along with the module which explain this requirement. In the latter case, a copy of these instructions must be included in the application for equipment
 electronically displaying its FCC identification number. (A) If using a permanently affixed label, the modular transmitter must be labeled with its own FCC identification number, and, if the FCC identification number is not visible when the module is installed inside another device, then the outside of the device into which the module is installed must also display a label referring to the enclosed module. This exterior label can use wording such as the following: "Contains Transmitter Module FCC ID: XYZMODEL1" or "Contains FCC ID: XYZMODEL1." latter case, a copy of these instructions must be
authorization.
(B) If the modular transmitter uses an electronic
display of the FCC identification number, the
information must be readily accessible and visible
on the modular transmitter or on the device in
which it is installed. If the module is installed
inside another device, then the outside of the
device into which the module is installed must
display a label referring to the enclosed module.
This exterior label can use wording such as the
following: "Contains FCC certified transmitter
module(s)." Any similar wording that expresses
the same meaning may be used. The user
manual must include instructions on how to
access the electronic display. A copy of these
instructions must be included in the application for
equipment authorization.
7. The modular transmitter must comply with any specific rules or operating requirements that ordinarily apply to
provide adequate instructions along with the module to
explain any such requirements. A copy of these
instructions must be included in the application for
equipment authorization.
8. Radio frequency devices operating under the Approved to comply with the applical
provisions of this part are subject to the radio RF exposure requirement, please s
frequency radiation exposure requirements specified the MPE evaluation
in §§ 1.1307(b), 1.1310, 2.1091, and 2.1093 of this
chapter, as appropriate. Applications for equipment
authorization of modular transmitters under this
section must contain a statement confirming
compliance with these requirements. The modular
transmitter must comply with any applicable RF
exposure requirements in its final configuration.
Technical information showing the basis for this
atotomont must be submitted to the Commission upon
statement must be submitted to the Commission upon request.
