Wireless Charging
for Apple Watch

Wireless Charging
for iPhone

Wireless Charging
for AirPods

LED Indicator

1. Put the power adapter plug into the groove.
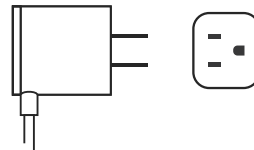

---

2. Insert the power adapter plug into the DC jack.

3. Rotate the cable into the groove.

---

4. Use the AC adapter to power the device.

5. Charge your device.

Aim the phone at the center line of the wireless charging pad to achieve the best charging efficiency.

Attention

* When wireless charging starts to charge the phone. The white indicator light will be on;

* If the phone is not aligned with the center line of the wireless charging pad,the charging efficiency will be reduced;

* If the phone deviates too much from the center line of the wireless charging pad, it cannot be charged normally and the indicator light will go out or flash.

* A mobile phone case with a thickness of more than 3mm or a mobile phone case with a magnetic/iron plate will affect wireless charging.

* Do not put anything else between your smartphone and the wireless charger such as credit cards, door keys, coins, metal, NFC cards, etc.

LED Indicator

Solid white	Charging mobile device
Flashing white	Metal detected or abnormal charging

* The light doesn't light up when the Apple Watch and AirPods is charging .

Tips : The charging speed is related to the ambient temperature. For fast charging, please place the wireless charger in a cool and ventilated place. For example, a cool room, or near a fan or air conditioner.
Do not expose it to direct sunlight; or place it near hot objects. Such as electrical appliances, heating, fireplaces, etc.

Important Safety Instructions
• Avoid dropping.
• Do not disassemble.
• Do not expose to liquids.
• For the safest and fastest charge, use original or certified cables.
• This product is suitable for moderate climates only.
• The maximum ambient temperature during use of this product must not exceed 40°C.
• Open flame sources, such as candles, must not be placed on this product.
• Only use a dry cloth or brush to clean this product.
