Click the device with Bluetooth name

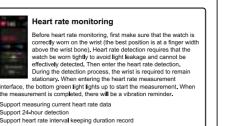

2. Binding devices with iOS mobile

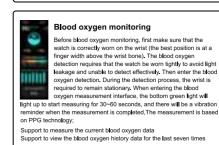

Audio setup

2. How can the device be supported to the "Unbind" button and select OK to unbind, Android phone
On the "Device" page of the APP, dick the "Unbind" button and select OK to unbind, iPhone
2.1 On the "My" - "Device Information" page of APP, dick the "Unbind" button;
2.2 Under "Settings" - "Bluetooth" - My device" of the iPhone, select the bracelet to be unbound, click the blue "I" sign at the back, and then dick "Ignore this device," Note: If the iPhone does not ignore the device, it will not be able to search the device when it is bound again, and it will still receive a reminder notice when there are reminders such as information and phone calls.

2. How can the device be unbound from the phone?

1. Why is there a reminder on QQ, WeChat and other information, but not on the bracelet?

3. Why are Android phones easy to disconnect? The APP must be running in the background so that Bluetooth will not automatically disconnect, but the Android mobile phone system memory management will force th APP to close, We need to manually turn off the power saving mode of the mobile phone system or add the APP to the green background of system management so that the APP will not be forced to close.

Other functions Bluetooth calls, common contacts, call records, voice assistant, sports records, women's health, blood pressure monitoring, breathing training, stopwatch, timer, alarm clock, message push, calendar, rest screen display and other functions.

FAQ

FCC Caution:
