

User Manual

Type1LV User Manual for FCC

■ Regarding FCC modular approval of Type1LV

Model Name: Type1LV

FCC ID:XX6LBEE59B1LV

This device complies with part 15 of the FCC Rules. Operation is subject to the following two conditions: (1) This device may not cause harmful interference, and (2) this device must accept any interference received, including interference that may cause undesired operation.

Type1LV User Manual for FCC

Since this module is not sold to general end users directly, there is no user manual of module.

The following statements must be described on the user manual of the host device of this module;

FCC CAUTION

- Changes or modifications not expressly approved by the party responsible for compliance could void the user's authority to operate the equipment.
Compliance with FCC requirement 15.407(c)
- Data transmission is always initiated by software, which is the passed down through the MAC, through the digital and analog baseband, and finally to the RF chip. Several special packets are initiated by the MAC. These are the only ways the digital baseband portion will turn on the RF transmitter, which it then turns off at the end of the packet. Therefore, the transmitter will be on only while one of the aforementioned packets is being transmitted. In other words, this device automatically discontinue transmission in case of either absence of information to transmit or operational failure.
- Frequency Tolerance: ± 20 ppm
- This transmitter must not be co-located or operated in conjunction with any other antenna or transmitter.

Type1LV User Manual for FCC

When installing it in a portable equipment. Please describe the following warning to the manual.

- The available scientific evidence does not show that any health problems are associated with using low power wireless devices. There is no proof, however, that these low power wireless devices are absolutely safe. Low power Wireless devices emit low levels of radio frequency energy (RF) in the microwave range while being used. Whereas high levels of RF can produce health effects (by heating tissue), exposure of low-level RF that does not produce heating effects causes no known adverse health effects. Many studies of low-level RF exposures have not found any biological effects. Some studies have suggested that some biological effects might occur, but such findings have not been confirmed by additional research. LBEE5HY1MW has been tested and found to comply with FCC radiation exposure limits set forth for an uncontrolled environment and meets the FCC radio frequency (RF) Exposure Guidelines.

It is necessary to take a SAR test with your set mounting this module.

- Class II permissive change application is necessary using the SAR report. Please contact Sepura.

Note.

- Portable equipment: Equipment for which the spaces between human body and antenna are used within 20cm.
- Mobile equipment: Equipment used at position in which the spaces between human body and antenna exceeded 20cm.

Antenna

- Please refer to the 'Antenna Specification' document supplied by Sepura
- or please contact Sepura for the detail designation of how to design the Antenna trace.

Type1LV User Manual for IC

- IC Number: 8739A-LBEE59B1LV
- HVIN: Type1LV
- Per RSS-Gen, Section 8.4 This device complies with Industry Canada license-exempt RSS standard(s). Operation is subject to the following two conditions: (1) this device may not cause interference, and (2) this device must accept any interference, including interference that may cause undesired operation of the device.

Type1LV User Manual for IC

- English
- This device contains licence-exempt transmitter(s)/receiver(s) that comply with Innovation, Science and Economic Development Canada's licence-exempt RSS(s). Operation is subject to the following two conditions:
 -
 - 1. This device may not cause interference.
 - 2. This device must accept any interference, including interference that may cause undesired operation of the device.
 -
- French
- L'émetteur/récepteur exempt de licence contenu dans le présent appareil est conforme aux CNR d'Innovation, Sciences et Développement économique Canada applicables aux appareils radio exempts de licence. L'exploitation est autorisée aux deux conditions suivantes:
 -
 - 1. L'appareil ne doit pas produire de brouillage;
 - 2. L'appareil doit accepter tout brouillage radioélectrique subi, même si le brouillage est susceptible d'en compromettre le fonctionnement.
