### Product charging

When the power of the keyboard or mouse is too low, the red indicator light on the product will start to flash until it is completely turned off. Please plug in the charging cable in time to ensure normal use.

When the power supply is too low: the transmission of the keyboard and mouse will be delayed, stuck, and the connection will be unstable.

## Keyboard Specifications

Reyboard Specifications			
Project name	Specifications		
Applicable system	WIN 8 (and above) system, MAC OS		
Battery specifications	280 mAh		
Standby time	600 hours		
Button life	3 million tap tests		
Working current	≤ 2 mA		
Continuous working time	300 hours		
Product Size	370.5*136*23.5mm		
Effective transmission distance	Within 10 meters		
Sleep time	Sleeps for 5 seconds after no operation		
Wake-up method	Press any key to wake up		

Project name	Specifications
DPI	800-1200 (default) -1600

#### Note:

Wake-up method

If the USB receiver is plugged into the computer, your keyboard or mouse can be turned on normally, but if there is no response, please try pairing yourself:

Turn on the keyboard, press ESC+Q, the light flashes quickly to enter the pairing state, immediately plug the receiver into the computer, Move the keyboard close to the receiver. The connection is successful, the light flashes slowly 3 times and then goes out. The connection is unsuccessful, the light flashes quicklylt will also go out after 10 seconds, you need to unplug the receiver and re-pair according to the above steps.

Press any key to wake up

- After the keyboard is successfully connected, first unplug the receiver and prepare to pair with the mouse.
- 3.Press and hold the middle button and right button of the mouse at the same time, do not release, then turn on the power, release the buttons after two seconds, The light flashes quickly and the mouse enters the

pairing state; immediately plug the receiver into the computer and move the mouse close to the receiver. After the connection is successful, the light flashes slowly 3 times and then goes out. If the connection is unsuccessful, the light will go out after flashing quickly for 10 seconds. You need to unplug the receiver and re-pair according to the above steps.

4. The pairing sequence of the keyboard, mouse and receiver does not affect the pairing code; if only the keyboard or mouse has no function, just follow the steps to pair it separately.

NOTE: This equipment has been tested and found to comply with the limits for a Class B digital device, pursuant to part 15 of the FCC Rules. These limits are designed to provide reasonable protection against harmful interference in a residential installation. This equipment generates uses and can radiate radio frequency energy and, if not installed and used in accordance with the instructions, may cause harmful interference to radio communications. However, there is no guarantee that interference will not occur in a particular installation. If this equipment does cause harmful interference to radio or television reception, which can be determined by turning the equipment off and on, the user is encouraged to try to correct the interference by one or more of the following measures:

- Reorient or relocate the receiving antenna.
- Increase the separation between the equipment and receiver.
- -Connect the equipment into an outlet on a circuit different from that to which the receiver is connected.
- -Consult the dealer or an experienced radio/TV technician for help.

Changes or modifications not expressly approved by the party responsible for compliance could void the user's authority to operate the equipment.

This device complies with Part 15 of the FCC Rules. Operation is subject to the following two conditions:

- (1) this device may not cause harmful interference, and
- (2) this device must accept any interference received, including interference that may cause undesired operation.
